- Up to 17 hrs talk time

Never miss a message

- Direct access answering machine on base and via handset
- Up to 30 minutes recording time

Save Energy

- Low power consumption: < 0.65 W in standby mode

PHILIPS

Highlights

MySound

Sound perception is subjective and everyone has their individual listening preference, therefore MySound provides you with three distinctly different profiles in your choice of sound to give you the ultimate listening experience: Clear - for making the voices very crisp and clear Soft - for a more friendly and soft voice Warm - for making the voice sound welcoming and warm.

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Low power consumption: < 0.65 W

Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in standby mode is less than < 0.65 W.

100-name phonebook

Always have the phone numbers of your loved ones available: Save up to 100 names in your phonebook.

Answering machine

Access all your messages directly from the base and the handset.
