Experience live music in your car

Obsessed with sound

Enjoy multiple-source music in your car with the Philips CE235BT. Stay connected to your music and important calls on your mobile, thanks to the built-in Bluetooth® receiver. Also features anti-theft detachable front panels for security.

Enjoy superior sound

- MAX Sound for instant power boost
- Music Zone for adjustable sweet spots
- Dynamic Bass Boost electronically enhances the low tones
- Super anti-shock protection for smooth music enjoyment
- Built-in 50 W x 4 amplifiers for excellent sound quality
- Support lossless audio formats for clear and authentic sound

Design that blends into your car

- High contrast LCD for perfect viewing
- Detachable front panel for anti-theft security

Easy to use

- Browse by folder or song for instant search or quick access
- Built-in Bluetooth receiver for call and music streaming
- USB slot for music playback and quick charging
- Audio out for amplifier addition

Highlights

Music Zone

Philips' innovative Music Zone technology lets the driver and the passengers enjoy their music with more vivid spatial effect, just as the artist intended it to be heard. Users can easily switch the music listening zones from the driver to the passengers and back again to get the best sonic focus in the car. A dedicated zone control button provides three pre-defined settings - Left, Right and Front (and All) - so you can best match your listening needs easily and dynamically alone or with your passengers.

DBB Dynamic Bass Boost

Activate the Dynamic Bass Boost (DBB), and the low-end bass frequencies are electronically enhanced to achieve consistent sound reproduction, especially when the speaker volume is set at a low level. You hear impressive bass at all times.

Browse by folder or song

This function allows you to find a track or album much faster by letting you browse through songs and folders, which are the usual contents of

USB/SDHC devices. With the dedicated folder/song button, only three simple steps are needed to make a search – press folder/song, rotate the volume knob and push to select. This simple process lets you search through your music quickly and easily, letting you to focus on your driving.

MAX Sound

MAX Sound technology produces an instant boost in bass and treble, maximising volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting bass, treble and volume beyond the original maximum levels without distortion. The end result is a noticeable amplification of both sound spectrum and volume and a potent audio boost that will add mileage to any music.

Built-in Bluetooth receiver

The Bluetooth hands-free feature lets you use your mobile phone safely while driving so you don't have to miss any important calls. With the built-in Bluetooth® receiver, you can also conveniently stream your music files from your phone to your car entertainment system.

USB Play and Quick Charge

The new Philips Universal USB charging interface supplies 1 Amp of current to a smart device, which is sufficient enough to charge its battery and power it up for intensive use. The software protocol is also designed to be universally compatible with virtually all smart phones available in the market and starts the charging process instantly when USB is connected.

Support lossless audio formats

FLAC (Free Lossless Audio Codec) is an audio coding format for lossless compression of digital audio. Digital audio compressed by FLAC's algorithm can typically be reduced to around half of its original size and it can be decompressed to an identical copy of the original audio data, giving a clear and authentic sound experience.

Specifications

Sound

Equalizer: 2-bands

Output power (RMS): 22 W x 4 channels (4 ohms, 10% T.H.D.)

Sound Enhancement: MAX Sound, Dynamic Bass Boost, Music zone

Equalizer settings: Classic, Jazz, Pop, Rock, Flat, Optimal, Techno, User defined
