## Power

- Battery lifetime: 12 Months
- Number of batteries: 2
- Battery saving manager: Auto switch on/off

## Infrared Capabilities

- Operating distance: 7 m

- Learning IR codes
- Learning frequency range: 30 kHz - 60 kHz
- Transmitting LEDs: 1
- Universal IR code database
- Number of brands in database: Over 1000
- Carrier frequency range: 28 - 70kHz
- Transmission angle: 90 degree

## Outer Carton

- EAN/UPC/GTIN: 87 10895 90768 2
- Height: 180 mm
- Length: 346 mm
- Quantity: 6
- Width: 120 mm

## Packaging Data

- 12NC: 908210005056
- EAN/UPC/GTIN: 87 10895 90767 5
- Gross weight: 0.36 kg
- Height: 38 mm
- Length: 338 mm
- Width: 162 mm

# Highlights

## Universal IR code database

A universal IR code database refers to a library of infrared codes built-in to a particular remote. This feature allows a remote to control your equipment without needing to learn individual signals. Select the correct infrared code sets in the database for the devices you want to control, to enable control of virtually every audio/video system element on the market today – regardless of model or brand.

## Microsoft controls included

A dedicated Microsoft Media Center green button is included on the remote, that gives access to dedicated Microsoft Media Center PC menu.

## Learning functionality

Learning functionality refers to the process through which a remote control captures and stores infrared signals from other remotes for later use. When device codes are not included in the on-board database, they can always be learned from the original remote, simply by pointing to it.

## Microsoft Vista compatibility

To play your favorite media files on your Microsoft Vista Media Center PC, the remote is equipped with the IR codes to be able to control your Vista PC, using the IR dongle supplied. Once you turn on the screen of your PC, and press the green button, the menu of your Vista PC will pop up. Now you can scroll through the content using your remote.
