The smart choice

Reliable quality coupled with practical features: this classic design with its modern touch makes the DECT515 really special.

Light up your calls
- Display for numbers, letters, icons and drawings
- LCD screen with backlighting for convenience in the dark
- Polyphonic ringtones for a more natural and realistic sound

Maximize your messaging experience
- Download ringtones from dedicated sites
- Text messaging (SMS) for short messages over a fixed line
- Eatoni predictive text entry simplifies writing SMS messages
- Obtain different types of messages for your answerphone

Benefit from easy-to-use technology
- Answering machine control from base and handset
- Clock alarm timer
- Lock your keypad to avoid hitting the wrong keys
- Pilot key & carousel menu navigates in a menu-in-cycle form

PHILIPS

Highlights

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Backlight on screen

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green color, while EL panels are smooth with blue, white or green shades.

Polyphonic ringtones

A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.

Ringtone download

This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any

other ringtones (country and network dependent).

Text messaging (SMS)

The Short Message Service (SMS) is a mechanism for delivery of short messages which can have up to 160 characters of text. These 160 characters are plain text in nature and can be comprised of words, numbers or an alphanumeric combination. The Eatoni®LetterWise predictive text editor helps you to write text messages more quickly. With its unique SMS system you can receive up to 200 messages in 10 different mailboxes. Greeting to a loved one, a quick reminder about an important meeting, …all this can now be put in a SMS and sent over the fixed network.

Eatoni text editor

Eatoni's LetterWise is an easy-to-use text-entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Downloadable outgoing messages

This function gives the user the possibility to download specific outgoing messages for their answering machine. Simply call the dedicated service provider and select your favourite

outgoing message. This message will be recorded on the answering machine by the service provider (country and network dependent).

Base and handset TAM control

Just look at the base station to know instanttly whether you received messages. Listening or deleting messages then become as simple as pressing one key on the base station - for those who never remember where they left their handset.

Clock alarm timer

Clock alarm timer

Keypad lock

How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidently pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Pilot key & carousel menu

The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Specifications
