- Touch-sensitive controls for smooth and easy access
- EasyLink to control all HDMI CEC devices via a single remote
- Wi-Fi-n Ready* for faster, wider wireless performance

PHILIPS

sense and simplicity

Highlights

Fully HD 3D Ready

Be enthralled by 3D movies in your own living room on a Full HD 3D TV. Active 3D uses the latest generation of fast switching displays for real life depth and realism in full 1080 x 1920 HD resolution. When you watch these images through special glasses that are timed to open and close the left and right lenses in synchronisation with the alternating images, the Full HD 3D viewing experience is created. Premium 3D movie releases on Blu-ray offer a wide and high-quality content selection. The Blu-ray 3D feature will be available on this system after software upgrade (visit www.philips.com/blu-ray).

CinemaPerfect HD

Philips' CinemaPerfect HD engine offers a new standard in clear and sharp video playback. This intelligent engine reduces noise and sharpens images to bring you higher quality video images than previously seen. Video noise

reduction and super scaling work to reduce the noise that is produced when video is compressed into MPEG format. With improved colour processing, the engine produces sharp, deep images on screen.

DivX Plus HD Certified

DivX Plus HD offers the latest in DivX technology to let you enjoy HD videos and movies from the Internet direct to your Philips HDTV or PC. DivX Plus HD supports the playback of DivX Plus content (H.264 HD video with high-quality AAC audio in an MKV file container) while also supporting previous versions of DivX video up to 1080p. DivX Plus HD for true HD digital video.

Net TV

Experience a rich selection of online services with Net TV. Enjoy movies, pictures,

infotainment and other online content directly on your TV via the Philips Blu-ray Disc player whenever you like. Simply connect the player directly to your home network through a wired or wireless connection, then navigate and select what you want to watch with the remote control. The Philips menu gives you access to popular Net TV services fitted for your TV screen.

DLNA Network Link

The DLNA Network link provides easy access to personal photos, music, videos or movies on your PC or Home Network. It uses the Ethernet (LAN) connection with DLNA protocol that ensures that DLNA-certified products will work together seamlessly. By connecting your Blu-ray Disc player to your home network, you will be able to access information from all DLNA-certified devices. You can access your world of entertainment at the simple push of a button with the intuitive user interface, which is designed for easy browsing.

Specifications

Picture/Display

- Blu-ray 3D: Full HD 1080p
- Advanced video processing: CinemaPerfect HD
