- Dolby Digital for ultimate movie experience

Designed to enhance your cinema at home

- Minimalistic chic design to suit a modern decor
- Orientation sensor ensures the best sound in any placement

PHILIPS

Highlights

Integrated active subwoofer

Integrated active subwoofer for powerful bass

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Dolby Digital

Because Dolby Digital standards, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

HDMI x 2

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio HDMI x 2 output to the connection in your non-3D AV receiver.

Bluetooth

Bluetooth is a short-range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favourite music from any smartphone, tablet or laptop, including the iPod or iPhone, with a Bluetooth-enabled speaker.

Orientation sensor

The quality of your sound experience is determined by how the Philips soundbar speaker is positioned in a room. Luckily, this soundbar speaker comes with a smart auto-orientation sensor that instantly optimises audio quality once it detects whether your soundbar is placed horizontally or vertically. So, whether you choose to sit your soundbar speaker on a shelf or mount it on a wall, you can be sure you'll always have a superb audio experience.
