Wake up to DAB or FM radio

Get clear DAB and FM with this Philips Clock radio. Find stations via digital tuning, and preset them as favourites. Automatic time synchronisation sets the clock for you, giving the correct time once it is powered up, even after blackouts.

Enjoy digital quality DAB radio

- Interference-free DAB radio
- FM digital tuning

Easy to use

- Wake up to your favourite radio tune or a buzzer
- Auto time synchronisation ensures accurate time without fuss
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant waking experience
- Sleep timer helps you to drop off to your favourite music
- Upgradeable software via USB for staying up to date

PHILIPS

Highlights

Interference-free DAB radio

DAB (Digital Audio Broadcasting) digital radio is, in addition to FM analogue transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in crystal clear, crackle-free sound quality. The technology allows the receiver to lock onto the strongest signal it can find. With DAB digital stations there are no frequencies to remember and sets are tuned by station name, so there is no retuning on the move.

Wake up to the radio or a buzzer

Wake up to sounds from your favourite radio station or a buzzer. Simply set the alarm on your Philips Clock radio to wake you with the

radio station you last listened to or choose to wake up with a buzzer sound. When the wake up time is reached, your Philips Clock radio will automatically turn on that radio station or trigger the buzzer to sound.

Auto time synchronisation

With the automatic time setting function in your clock radio, you do not ever have to set the time. The clock synchronises with radio signals automatically, even when it is switched off. It updates itself within one minute when there is an immediate need for adjustment, and makes routine synchronisations with radio signals to ensure it keeps accurate time always. From the first time you take the clock radio out of the box, to the time a power outage occurs, you can depend on your Philips product to give you the right time, fuss-free and reliably.

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

Gentle wake

Start your day the right way by waking up gently to a gradually increasing alarm volume. Normal alarm sounds with a pre-set volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favourite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Sleep Timer

Sleep timer lets you decide how long you want to listen to music, or a radio station of your choice, before falling asleep. Simply set a time limit (up to 2 hours) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch to a power-efficient, silent standby mode. Sleep Timer lets you fall asleep to your favourite CD or radio DJ without counting sheep or worrying about wasting power.

Specifications

Tuner/Reception/Transmission

- DAB: Band III, Info display, Smart Scan, Menu
- Tuner Bands: FM
- Auto digital tuning
- Station presets: 20
- Antenna: FM Antenna

Sound

- Volume Control: Volume Control up/down
