- Call log entries: 10

Highlights

Plug & Play pack - 2 handsets

The unique soft touch feel ensures that the phone lies perfectly within your hand and increases comfort while calling.

Free intercom

No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

CS² Crystal Sound System

Philips' unique Crystal Sound System (CS²) audio technology improves the sound quality of Philips DECT phones. CS² audio quality is demonstrably better than competitive DECT products and brings with it distinct benefits.

Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.

Caller Identification

If you want to know who's calling you before you answer the call, then Caller Identification is for you. You can see the number (or the name) of the person calling, allowing you to decide whether to answer the phone or not. Caller Identification cannot disclose the number if the number is withheld, or unavailable. This service is country and network dependant, and requires a subscription to your network operator.

Paging key

Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.
