PHILIPS

Cordless phone with answering machine
12 min answering machine 1.6" display/ amber backlight, Black

CD1951B/53

Highlights

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and handsfree modes.

Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by

distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

Up to 15 min. recording

With up to 15 minutes recording time, you'll never miss an important message.

4.1cm (1.6") display

Easy to read 4.1 cm (1.6") display with amber backlight

Easy setup

Ultimate convenience through easy set up. Simplified installation - Plug & Play product

50-name phone book

Always have the phone numbers of your loved ones available: Save up to 50 names in your phonebook.

Caller ID

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.
