Highlights

### Powered by 4 neodymium drivers

Powered by 4 neodymium drivers

Bluetooth portable speakers

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to other Bluetooth devices, so you can play your favourite music from any smartphones, tablets or even laptops including iPod or iPhone on Bluetooth-enabled speaker easily.

Motion sensor

SHOQBOX is equipped with a motion sensor. Simply swipe over the sensor from left to right

or right to left, to skip to the next or last track. Put your hand over the sensor for a second to pause the music. Do it again to put it back on. Easy gesture control allows you to control your music the simplest way.

Built-in mic

With its built-in microphone, it also works as a speaker phone. When a call comes in, the music is put on pause and you can talk via the speaker. Call for a business meeting. Or call your friend from a party. Either way, it works great.

Voice prompt

The voice prompt is available in different languages. It gives instant feedback on battery level or alert whether the speaker is connected properly to your device.

Pairing 2 shoqboxes

You can pair 2 SHOQBOX speakers with the smart sensor for a stereo system of Left and Right channels. Simply place the two speakers side by side and swipe your hands over both sensors from outside simultaneously. Perfect for a party or gathering. Enjoy big stereo sound from music, movies and games.

Specifications
