Lead Free

# Highlights

## High pixel density display

The very best high density screen in the industry displays 88 percent more pixels per square inch than even a high end 43 cm (17") LCD monitor -- showing off your treasured photos with the same 'real life' rich detail and vibrant colors as high quality prints.

## Rich, vibrant colors

Full color display brings out the best in your photos with vibrant, real life colors by displaying the same full range of colors found in professionally printed photos.

## Quality design and materials

High quality design and exquisite materials include a solid stylish stand, designer frame and detailed finishing that convey an impression of value and refined taste, adding luster to the photos displayed on PhotoFrame.

## Elegant table-top design

Decor enhancing design melds form and function in an elegant, eye-appealing package that complements refined, stylish home decor - whether you're displaying your photos in landscape or portrait orientation.

## Memory card slots

Two memory card readers are built-in for easy viewing and sharing of photos stored in memory cards. One memory card slot accepts Compact Flash I (CF) cards while the second accommodates Memory Stick (MS), SD Card and Multi Media Cards (MMC).

## Easy USB connectivity

A USB connector is built into the device for easy and quick downloading photos from a PC.

## Create slideshows

A slideshow is a collection of images arranged in sequence for presenting to an audience. Pressing the button and selecting the slideshow function automatically displays all photos stored on your PhotoFrame page-by-page.

## Multiple viewing modes

Flexible display modes give you the freedom to display your photos one image at a time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.

## Run on built-in battery or AC

AC or onboard battery power give you the choices of operating your PhotoFrame on standard AC power or cordlessly with the onboard rechargeable battery.

## On-off timer

A built-in clock turns your PhotoFrame™ on or off at times you select.
