### Connect and enjoy multiple sources

- USB Media Link for media playback from USB flash drives

# PHILIPS

Digital receiver  
with DVD Playback

DTP4800/31

# Highlights

## USB Media Link

The Universal Serial Bus or USB is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. With USB Media Link, all you have to do is plug in your USB device, select the movie, music or photo and play away.

## Built-in digital tuner

Built-in digital tuner for DVB-T radio and TV reception

## HDMI 1080p

HDMI 1080p upscaling delivers images that are crystal clear. Movies in standard definition can

now be enjoyed in true high definition resolution - ensuring more details and more true-to-life pictures. Progressive Scan (represented by "p" in "1080p") eliminates the line structure prevalent on TV screens, again ensuring relentlessly sharp images. To top it off, HDMI makes a direct digital connection that can carry uncompressed digital HD video as well as digital multi-channel audio, without conversions to analogue - delivering perfect picture and sound quality, completely free from noise.

## Multimedia DivX

Play CD, (S)VCD, DVD, DVD+- R/RW, DivX, MP3, WMA, JPEG

## One-touch MP3 creation

Convert the contents of your favourite CDs to MP3 files on your Philips product and store them directly on a thumb drive or on your portable media player through a USB cable. Enjoy the convenience of creating MP3 files right in your living room, without a PC and even while the CD is playing.

# Specifications

## Audio Playback

- Compression format: Dolby Digital, MP3, MPEG2 Multi-channel, PCM, WMA
- Playback Media: Audio CD, CD, CD-R/RW, DVD+R/+RW, DVD-R/-RW, USB flash drive
