- Play MP3-CD, CD and CD-R/RW
- Digital tuning with preset stations for extra convenience
- Audio-in for portable music playback

#### Design that blends into your interior

- Wall-mountable option for flexible placement
- Compact design fits any space, any lifestyle

# PHILIPS

# Highlights

## DualDock to charge & play

The innovative Philips DualDock with Lightning and 30-pin connector can charge and play any Apple device. Created to meld sleek styling with effortless functionality, you can switch between either connector in a flash. Enjoy your favorite tunes no matter what Apple device you want to use.

## Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to

vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

## Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

## USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

## Digital Sound Control

Digital Sound Control offers you a choice of pre-set balanced, clear, powerful, warm and bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

## DAB and FM compatible

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

# Specifications

## Sound

- Volume control: up/down
- Sound Enhancement: Digital Sound Control
- Output power (RMS): 10W

## Loudspeakers

- No. of built-in speakers: 2
- Speaker drivers: 2.75" woofer
