- SMS
- Name and Caller ID
- Caller ID on call waiting
- Operators services phonebook

Memory Capacity

- Name & number shared phonebook: 50
- SMS storage capacity: 15
- Call log entries: 10

Highlights

Text messaging (SMS)

The Short Message Service (SMS) is a mechanism for delivery of short messages which can have up to 160 characters of text. These 160 characters are plain text in nature and can be comprised of words, numbers or an alphanumeric combination. The Eatoni@LetterWise predictive text editor helps you to write text messages more quickly. With its unique SMS system you can receive up to 200 messages in 10 different mailboxes. Greeting to a loved one, a quick reminder about an important meeting, ...all this can now be put in a SMS and sent over the fixed network.

Direct SMS key

No need to go through various menus when writing or reading SMS. The direct SMS key makes messaging more convenient and even faster.

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Pilot key & carousel menu

The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Clock alarm timer

Clock alarm timer

Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.

Free intercom

No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

Baby-sit function

Worried about your baby not sleeping? No need to constantly go and check in his bedroom. The baby-sit mode allows you to keep an ear on him wherever you are in the house.

Conference call function

Thanks to the conference call, there is no need to travel to meet people. Especially useful in a professional environment where several work stations are connected to the same base station, the conference call allows, for example, two colleagues from Paris to communicate with a colleague in China. A conference call allows two handsets to share the same external phone conversation in such a manner that each handset is able to communicate with the two others.
