

Philips 6000 Series  
Smart safe box

### Fingerprint unlocking

Electronic telescopic handle  
WiFi connectivity  
Two-factor authentication

**SBX602C6GU**

## WiFi connectivity

Enhance security with real-time protection

SBX602 supports various unlocking methods. It features an innovative fingerprint-enabled telescopic handle for seamless security. Along with WiFi connectivity and dual authentication mode, it provides a safe and convenient storage solution.

### Upgraded intelligence for enhanced security

- Enhanced security mode supports two-factor authentication
- WiFi connectivity ensures real-time monitoring
- Multiple unlocking methods for quick access

### Exquisite craftsmanship for reliable safety

- Seamless digital panel responds quickly to touch
- Integrated design offers seamless defense
- Crafted telescopic handle boasts elegance
- 32 mm locking bolts against drilling and prying

### Caring details to safeguard your private space

- Organized storage enables easy access
- Alerts on APP provide peace of mind every day
- Concealed compartment to safeguard privacy
- Built-in LED light for easy navigation at night
- Keyhole concealed on door's side for discreet security

# Highlights

## Enhanced security mode

In the enhanced security mode, opening the cabinet door requires verification of any two sets of configured fingerprints or passwords, providing a dual-layered safeguard for the security of your valuable belongings.

## WiFi connectivity

Through mobile device WiFi connectivity, our intelligent monitoring system ensures real-time security updates for the safe, granting you greater peace of mind while you're away.

## Multiple unlocking methods

It comes with a concealed digital panel and touch-to-wake buttons. The advanced semiconductor biometric fingerprint technology ensures precise and highly secure identification. There is also a mechanical keyhole located on the door's side for a hassle-free and worry-free unlocking experience.

## Seamless digital panel

The digital panel design seamlessly integrates into the surface, striking a balance between aesthetics and concealment. The matte finish provides a comfortable touch while effectively resisting smudges, scratches, and fingerprint marks, ensuring a user-friendly interface.

## Integrated cabinet body

The safe is constructed from high-strength carbon alloy steel plate, cut and formed using laser technology, providing effective resistance against prying, smashing, and drilling. Its robust and durable build ensures long-lasting security. The minimalist dual-line design of the door not only enhances aesthetics but also adds a touch of contemporary style to the safe.

## Crafted telescopic handle

Presenting an innovative design, the electronic telescopic handle features an embedded

fingerprint unlocking system. Crafted from electroplated zinc alloy, the handle guarantees great corrosion resistance and durability. During everyday use, the handle stays hidden within the cabinet, extending automatically when unlocked. After securely closing and locking the door, the handle retracts automatically.

## 32 mm solid locking bolts

The safe's door is fortified with 32 mm solid stainless steel locking bolts, which tightly secure the door panel upon locking. This robust design not only ensures durability but also significantly elevates the overall security level.

## Compartmentalized storage

The cabinet interior employs a distributed layout, complete with rail-guided drawers, offering easy storage for valuable items like jewelry and small objects. The synthetic leather interior adds a comfortable touch, ensuring a pleasant storage experience.

# Specifications

## Color scheme

- Gray

## Power supply

- Battery life\*: 6-12 months
- Working voltage: 4.5 ~ 6 V
- Battery for backup system: 4 pieces AA battery

## Net weight of product

- 89 kg

## Dimensions of product (LxWxH)

- 650x430x390

## Unlocking methods

- Fingerprint: maximum 30 sets
- PIN code: maximum 10 sets
- Mechanical key

## Indicator lights

- Blue: normal working
- Green: recognition succeeded
- Red: recognition failed

Issue date 2023-11-21

Version: 2.2.1
