SW100M

Spotify in every room

Enjoy Spotify on your Hi-Fi system

Enjoy all of Spotify's music with the Philips Spotify multiroom adapter. Just connect it and you're ready to play Spotify on your Hi-Fi. The Spotify app is your remote and you can stream to any room. Hit play to start where you left off.

Using the Spotify app as a remote for your speakers

- Spotify Connect for an effortless native app experience
- Music streams directly on speakers, save mobile battery
- Music keeps playing through calls, videos and games
- Direct access buttons - no app required, for easier control

Multiroom speakers for you and your family

- Play music from one speaker at a time or all at once
- Philips companion app simplifies wireless speaker setup

Just hit the 'PLAY' button

- One-press 'Play' for the last Spotify track
- Flip from room (speaker A) to room (speaker B)
- Press 'Play' for 'Music Follow Me'

Flexible audio output

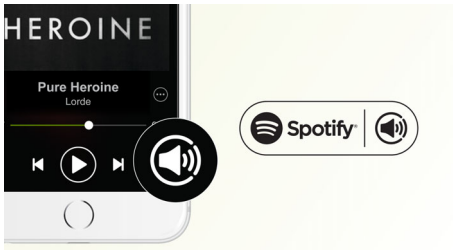

- Connect your music system to play direct from Spotify
- Flexible output: (Analogue) AUX out, (Digital) COAX and OPTIC

Spotify Connect Multiroom, Just hit "PLAY"

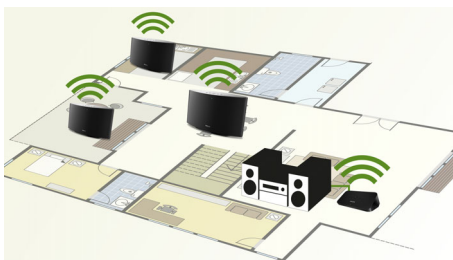

Highlights

Spotify as a remote

Using Spotify Connect you can easily browse, explore and play music from any room in the house using your smart device as a remote. With a direct Spotify connection, you can play music straight from the cloud so your smart device can be used for calls or videos, or even go out of range, without interrupting your music. This is also more battery-friendly, since the energy used for music is minimised. All the same great Spotify features are there, from its ready-made lists to its high sampling rates. Everything you need to discover new music and hear it at its best.

Multiroom speakers

The Spotify multiroom adapter lets you play songs in one room or in many at the same time, so your music can either follow you around the house or stay where you want it. Each person can play to any selected speaker with it, and when additional Spotify devices are purchased they can be added to the system wirelessly and easily.

'Play' for the last song

Listen to your favourite tunes almost without interruption. Just hit 'Play' on the speaker to start playing the last song you heard on Spotify, without even unlocking your smart device.

Press 'Play' for 'Music Follow

When you press 'Play', music starts instantly on the speaker, regardless of whether it was last played on a smartphone, tablet or other smart device. This feature also lets you flip from one speaker to another in different rooms.

Direct access without app

Handy control buttons (Play / Pause, Volume Up / Down, Previous / Next) give you access to the controls you need, without fiddling with an app. Once an album, playlist or station has

SW100M/10

been selected, skipping tracks, repeating or pausing the music can be done at the touch of a button.

Flexible output

Listen to Spotify from any device using the Spotify multiroom adapter. Connect everything from cutting-edge Hi-Fi systems to classics through analogue Digital COAX, OPTICAL OUT and analogue AUX OUT. Enjoy the flexibility of connecting to any device you want to for your musical enjoyment.

Philips companion app

The Philips SpeakerSet Multiroom Manager app helps you set up and manage your Philips Spotify Multiroom speakers effortlessly. Simply connect your new Philips Spotify Multiroom Speaker to your home wireless network. If you have more than one speaker, use the app to group the speakers for Multiroom flexibility.
