HealthSuite Imaging

Enterprise Imaging any time, anywhere – securely.

Introducing a paradigm shift in medical imaging

Enterprise Imaging – at your fingertips

Clinicians and referring physicians need fast, secure access to both patient data and their diagnostic or viewing tool set. But the cost barriers and the complexity of owning and maintaining healthcare information systems can hinder this access and compromise the quality of care.

HealthSuite Imaging, the Philips radiology cloud service, is a liberating force in medical imaging IT. It releases healthcare organizations from technological, geographic and economic constraints by providing on-demand access to advanced software applications and tools.

Experience the benefits of HealthSuite Imaging

Greater freedom for **patient-centered care**

Philips HealthSuite Imaging delivers on-demand radiology services on a pay-as-you-go basis. It frees healthcare institutions from cumbersome IT infrastructure management, allowing increased focus on what matters most: patient care.

All-in-one

HealthSuite Imaging provides all-encompassing radiology services.

Radiology workspace

Reading and reporting capabilities that help clinicians get to a fast, precise interpretations of data

The Cloud Radiology Workspace enables radiologists and physicians to securely access and share medical images from anywhere, as long as an Internet connection is available. Intuitively organizing in a single workspace all the relevant information and clinical tools needed for a confident reading in a coherent workflow, this web-enabled platform is designed with reading workflow agility in mind, without compromising quality.

Clinical repository

Remote, secure storage that serves as an archive or your primary reading solution

The HealthSuite Imaging standards-based clinical repository enables ingesting, storing, managing and sharing multi-ology medical images and related patient data. The vendor-neutral repository seamlessly integrates with other healthcare systems and applications, on-premises or in the cloud. Clinicians can collaborate through chat and screen-sharing, allowing them to easily access and share medical images across departments and facilities. Patients can also access their results and share those results with other providers – improving the patient experience.

Long-term archive

Access cloud-archived images and reports either directly or using your local PACS

HealthSuite Imaging provides secure, scalable cloud-based archiving services designed to store large amounts of data over a long period of time.

A solid collaboration for your **peace of mind**
