- SMS storage capacity: 60
- Call log entries: 40

Highlights

Color screen

The color screen adds more fun and excitement by enriching messages and other features. The large color display can show up to 6 lines of text with a 4k pixel resolution. Color also makes your phone easier to use: menus and sub-menus are easily read and icons are easily identified, allowing any desired applications and functions to be located and selected quickly and easily.

White backlight

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark.

Ringtone download

This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any other ringtones (country and network dependent).

Eatoni text editor

Eatoni's LetterVise is an easy-to-use text-entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Personal mail boxes

Children at a certain age need some privacy at home when sending SMS to their friends. But paying for several mobile phones quickly gets very expensive. DECT phones provide up to 9 personal SMS mail boxes which can be protected by a PIN code - SMS can stay private despite collective phone usage. The user must tell his correspondents his mail box number so that they can send short messages directly to this personal mail box. Sending a SMS from a personal mailbox makes it easy for the addressee to reply directly to this mailbox without having to remember the mailbox number.

Comfort size handset
