Highlights

Wireless PC link
The product is connected to a TV or stereo. A wireless link is established between the PC and the product. You can navigate through PC multimedia content on your TV and stereo using the remote control.

Instant wireless PC Link
An out-of-the-box solution if you don't have a wireless network. Plug the supplied Wireless USB adapter into your PC. Connect the receiver to your TV and/or stereo. The Wireless USB adapter now connects your PC to your receiver product.

Internet connected
Get 'one-button' access to online music, movie trailers, music videos, photo collections and Internet games on your TV and stereo. There's no need to download files to your PC first, or even turn the PC on to stream Internet multimedia content without hassle. Requires broadband Internet connection.

Internet upgradeable
New features, functions and media formats automatically downloaded over the Internet via a broadband connection straight into your device.

DTS Digital Surround
DTS delivers superior surround sound with your DVD movies.

Dolby Digital Surround
Because Dolby Digital and DTS, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

Dolby Pro Logic II Surround
Dolby Pro Logic II is an advanced matrix decoder that derives five channels of surround sound, including two full-range surround channels, from any stereo source.

Class 'D' Amplifier
The Class 'D' Digital Amplifier takes an analogue signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output delivers all the advantages of digital audio, including improved sound quality. In addition, the Class 'D' Digital Amplifier has over 90% efficiency compared to traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.

Clearvoice™
Clearvoice™ is a Philips unique dialogue enhancer that clearly separates speech from action.

Multi-format Movies
Multi-format playability allows you to play most disc formats for maximum disc compatibility and viewing pleasure.

Multi-format Music
Multi-format playability allows you to play most disc formats for maximum disc compatibility and listening pleasure.

Picture CD (JPEG)
Multi-format playability allows you to view images in the comfort of your living room and play most disc formats for maximum disc compatibility and viewing pleasure.
