PHILIPS

HealthSuite Imaging

Philips HealthSuite Imaging connects the power of the enterprise imaging platform with the scalability and security of the cloud

Give clinicians and radiologists what they need

Effective, agile clinical workflows with near real-time visibility over all imaging data, even remotely with:

- A web-enabled diagnostic workspace
- An AI-driven workflow orchestrator
- Integrated clinical collaboration
- Actionable diagnostics using 3D processing
- Advanced cloud reporting
- Image sharing with centralized archiving

Give IT and BioMed teams what they need

Securely and easily manage a growing volume of medical images and data – all in one place with:

- Philips-managed technology (including integrating systems and keeping them up to date)
- Anytime availability of stored images and reports
- 99.99% uptime for mission-critical apps
- Tailored services to meet your specific needs

Philips + Amazon Web Services

A powerful partnership brings Philips imaging solutions to the cloud. We chose to deliver our highly secure clinical applications on the Amazon Web Services infrastructure - a cloud platform designed as its core to be reliable, flexible and secure.

PHILIPS
aws
