Highlights

Powerful brightness
Signaling the intended movement of your vehicle is vital to your safety. To avoid collisions, other people have to know what youre doing. And when poor weather reduces visibility, the need for bright and vibrant signaling becomes even greater. Philips Ultinon Pro7000 LED signaling lights provide powerful brightness with 15 LEDs for your stop and tail signals. They will help other drivers to see you better, which is vital for them to react sooner. The earlier you are seen, the safer your drive will be!

Instant-on technology
Compared to incandescent lamps, Philips Ultinon Pro7000 LEDs light up instantly to ensure that other drivers can react faster, keeping you safer.

Uniform light distribution
For your turn indicator, reverse, rear fog and stop signals, the Philips Ultinon Pro7000 LED gives you uniform light distribution. Its 360 angle ensures that the light is projected where you need it. Not only can you see more of the road, but other drivers can also see more of you.

Elegant LED light
While the main goal of exterior lighting is to help you see and be seen, theres no reason why you shouldnt look good at the same time. If you want to upgrade your style without buying a newer car, replacing your exterior lighting with Philips Ultinon Pro7000 LED signals is a smart way to spend your money.

Lifetime of up to 5,000 hours
You want bright, stylish car lights but you dont want to keep replacing failed lamps. That's a major weakness of conventional bulbs - the more powerful the light, the shorter its lifespan. Even at a higher light intensity, LEDs last much longer. Philips Ultinon Pro7000 LED lights are built to last. Due to features such as high-end LED technology and advanced heat-management systems, they last for up to 5,000 hours of operation and are covered by a 3-year warranty*.

Super-robust lamps made with aluminum
When operating, LEDs generate heat which reduces their brightness and overall lifespan. Philips Ultinon Pro7000 LED lights feature an aluminum heatsink which dissipates heat much faster than the conventional plastic base used by low-cost, inferior-quality bulbs. That makes our lamps more robust and longer-lasting.

Ready, steady, installed!
Enjoy the plug-and-play experience: Philips Ultinon Pro7000 LED lights use the same standard caps as the conventional lamps on your car, enabling you to upgrade with no modification needed, so replacement is quick and easy.

Electrical compatibility with most cars and trucks
LED retrofit and conventional bulbs differ from one another in terms of wattage, composition and power consumption. Replacing your conventional bulbs with other LEDs may prove problematic. Thanks to the built-in constant IC driver, Philips Ultinon Pro7000 bulbs work within 9-32 volt systems and are electrically compatible with most cars and trucks. Canbus adapters are available as accessories for troubleshooting if needed. We sell a complete solution.

Polarity-free design
Enjoy the plug-and-play experience: the Philips Ultinon Pro7000 comes with polarity-free design, so you dont need to worry about polarity during installation. It will save you time and make installation easier.

Specifications

Marketing specifications
- Product highlight: Automotive Grade LED Powerful brightness Uniform light distribution
- Expected benefits: Brighter, elegant signals

Product description
- Application: Stop and tail lights for 12 and 24V vehicles
- Base: BAY15d
- Designation: P21/5W LED White 11499 CU70 12/24V X2
- Designation LED Type: LED-WHITE [≈P21/5W]
- Homologation ECE: NO
- Range: Ultinon Pro7000
- Technology: LED
- Type: P21/5W
- Voltage: 12V + 24 V V

Lifetime
- Life time: 5000 hrs

Light characteristics
- Lumens: 340lm / 140lm (12V) 430lm / 230lm (24V)
- Color temperature: 6000 K

Electrical characteristics
- Voltage: 12/24 V
- Wattage: 2.7W / 0.9W (12V) 3.5W / 1.6W (24V)
