1 Your SRP2002

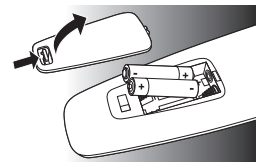

Congratulations on your purchase of the Philips SRP2002 universal remote control. After setting up the remote control you can operate up to 2 different devices with it: TV and VCR/DVD players/recorders (including Blu-ray player).

To fully benefit from the support that Philips offers, register your product at:
www.philips.com/welcome.

2 Getting started

2.1 Inserting the batteries

- Insert 2 AAA type batteries, noting the + and - configuration in the battery compartment.

Note

When replacing the batteries, all user settings will be retained in the remote control memory for 5 minutes.

2.2 Setting up the universal remote control

The example below instructs you how to set up your universal remote control for your TV. You can repeat the same steps for other devices (DVD player/recorder and VCR) which you want to operate, using the SRP2002.

The remote control can be set up to operate any 2 of the following devices:

Device name	Description
TV	Traditional TV, flat screen TV and projection TV, TV part of TV/VCR, TV/VCR/DVD and TV/DVD combos
DVD	DVD player; Blu-Ray player; High Definition DVD player (HD-DVD), DVD part of TV/DVD, TV/VCR/DVD and VCR/DVD combos
VCR	Video cassette player/recorder; VCR part of TV/VCR, TV/VCR/DVD and VCR/DVD combos

Example: setting up the universal remote control to operate your TV:

- 1 **Switch ON** the TV manually or use the original remote control for this. Tune to channel 1.

- 2 **Press and hold** the  device selection button **for 5 seconds** until the green Setup light  lights up.

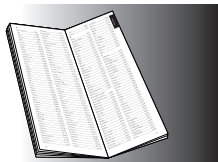

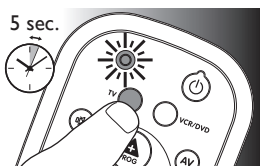

- The remote control is now in setup mode.

- 3 Look up the 4-digit code for your brand in the brand list at the back of this user manual.

A four-digit code is shown for each brand.

Use the digit buttons to enter the code for your brand.

- If the green Setup light  turns off, an invalid code was entered. In this case, try again.

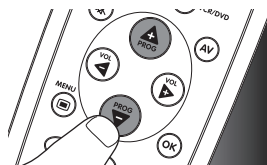

- 4 Aim the remote control at the TV. **Press and hold** the  button. Release it **immediately** as soon as the TV switches off.

- This step normally takes between 5 and 60 seconds. In extreme circumstances this step can take up to 15 minutes.

- 5 **Switch ON** the TV. Try out the buttons that you need for operating it. Try, for example, if the ,  and digit buttons function properly.

- If a button does not work as expected, **press and hold** that button. Release it **immediately** as soon as it works. For more information, see chapter 2.2.2.

- 6 Press the  device selection button **twice** to finish setup.

- When no button is pressed for 5 minutes or more, the remote control will exit setup mode, automatically saving all your settings.

Important

If you made a mistake:

- Press the device selection button **twice** to exit setup. The green Setup light  turns off.
- Restart from the beginning.

- *If the device does not respond at all or not to all of the button commands or if you cannot find the code for your brand, enter '9, 9, 9, 9' in step 3 and continue with step 4. The remote control will now search its full database for a code that works with your TV. Full database search may take up to 15 minutes.*

2.2.1 Setting up the remote control for other devices (DVD player/recorder and VCR)

- 1 Make sure the device is switched on and operational. E.g. insert a disc in the DVD player/recorder or a video cassette in the VCR.
- 2 Then follow steps 2 to 6 of 'Setting up the remote control for your TV'. Make sure to use the correct device selection button: .

2.2.2 Improving buttons

When correctly set up, the remote control should be able to operate all your devices. However, when using the remote control for the first time it might occur that some buttons do not yet function as expected.

In this case you can have the remote control search for alternatives.

Note

Improving buttons is not possible when the code was found during full database search (with code '9, 9, 9, 9').

During initial setup

- 1 Make sure the receiving device is able to respond.
E.g. when you try to repair the Play button for your DVD player, make sure to insert a DVD into the DVD player otherwise the Play button is not able to function.
- 2 Press the button that does not function, keep it pressed and **immediately** release it when the device responds. Repeat this for every button that does not function.
 - If the button still does not function as expected, try pressing it again for a longer period of time.

After initial setup

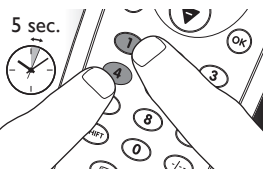

- 1 Make sure the receiving device is able to respond.
E.g. when you try to repair the Play button for your DVD player, make sure to insert a DVD into the DVD player otherwise the Play button is not able to function.

- 2 Select the device you wish to operate (e.g. DVD).
Press the  device selection button to select DVD.

- 3 Keep buttons  and  pressed simultaneously for 5 seconds.

- The green Setup light  lights up. The remote control is now in setup mode.

- 4 **Press and hold** the button that does not function and **immediately** release it when the device responds.
 - If the button still does not function as expected, try pressing it again for a longer period of time.

- 5 Press the  device selection button **twice** to save your settings and exit setup mode.

- When no button is pressed for 5 minutes or more, the remote control will exit setup mode, automatically saving all your settings.

3 Using the universal remote control

3.1 Buttons and functions

The illustration on page 2 gives an overview of all buttons on the remote control. Try out the buttons you need for operating your devices.

Notes

- Buttons having the same functions as the buttons on your original remote control may have different namings on the SRP2002 (e.g. Info/Display).
- Only functions that are available on your original remote control can be used for operating your devices with the SRP2002.

- 1  setup light. Lights up when a remote control command is being sent, when you just selected a device and when the remote control is in setup mode.
-  switches the selected device on/off.

Note

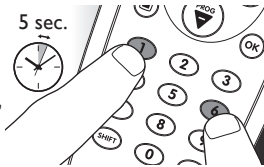

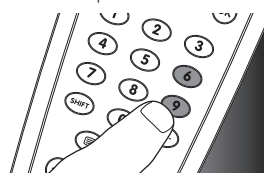

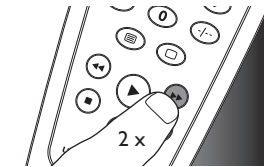

For some TV brands/types, the  button will only switch off the TV. You will have to press a digit button (direct channel selection) to switch on the TV again.

- 2   device selection buttons.
Select the device to be operated.
- 3  mutes TV sound.
- 4  switches between external (Audio/Video) inputs of your equipment.

- 5   previous/next channel.
  adjust TV volume.
- 6  wide screen (TV).
- 7  confirms your selection.
- 8    digit buttons for direct channel/track selection.
  
  

- 9  for extra functions. When pressed at the same time as a second key, the second key will get another function.
For example:
 +  menu on/off.
 +  menu up.
 +  menu down.
 +  menu right.
 +  menu left.
- Try out other combinations with the  key on your device in order to find out which functions are available. Only functions featured on the original remote control are available.
- 10  selects between one and two-figure channel numbers and channel numbers with more than two or three figures.
- 11   teletext on () / off ().
- 12  rewind.
 play.
 fast forward
 stop.
 record.
 pause.

3.2 Resetting a button to its original function

If an improved button (see chapter 2.2.2.) still does not function as expected, you can always reset the button to its original function.

- In the current device mode, keep digit buttons  and  pressed simultaneously for 5 seconds, until the green Setup light  lights up.
 - The remote control is now in setup mode.
- Press digit buttons  and , in that order.
 - After each button press the green Setup light  blinks once.
- Press the button that you wish to reset **twice**.
 E.g. the  button.
 - After each button press the green Setup light  blinks once.
 - The green Setup light  will blink one more time to confirm that the button was successfully reset to its original function.

4 Service and support

4.1 Frequently asked questions

In this chapter you will find answers to the most frequently asked questions about your universal remote control.

4.1.1 Setup

I cannot enter setup mode.

Battery level too low or battery lifetime came to an end.

- Replace the batteries. See chapter 2.1.
After replacing the batteries, test if the remote control still operates your devices. If it does not, you have to set up the remote control again. For this refer to chapter 2.2.

The brand code for my device is missing in the 'Shortlist of brands' in the Quick Start Guide.

The 'Shortlist of brands' only mentions the most common TV, VCR and DVD brands.

- You will find a complete brand list on page 14-24 of this user manual.
- Use '9999' as 4-digit code in case you cannot find your brand in the complete brand list. Note that using '9999' may result in a long setup (up to 15 minutes).

My TV turns OFF in step 4 but does not turn ON again in step 5.

TVs of some brands (e.g. Panasonic) only switch ON after a long press on one of the digit buttons. After a long button press in setup mode the remote control will start trying to improve the button (see chapter 2.2.2) instead of switching ON the TV.

- In this case, switch ON the TV manually or use the original remote control for this. Continue with step 6. After successfully completing setup, the remote control will switch ON the TV with a long button press on one of the digit buttons, just as your original remote control.

After setup, not all buttons work as expected.

- Try improving the button(s). See chapter 2.2.2.

How do I set the remote control for combo devices (TV/VCR, TV/DVD, DVD/VCR, etc)?

Some combo devices require you to set up two different source selection buttons to control both parts of the combo device. For example, if you have a TV/DVD combo, you might need to set up the remote control for both TV and DVD to operate your TV/DVD combo.

4.1.2 Operation

The remote control does not wake up anymore.

Battery level too low or battery lifetime came to an end.

- Replace the batteries. See chapter 2.1.
After replacing the batteries, test if the remote control still operates your devices. If it does not, you have to set up the remote control again. For this refer to chapter 2.2.

The device I want to operate does not respond at all/does not respond to all of the button commands.

- Check if the buttons you press are available on the original remote control of the device.
- Try improving buttons. See chapter 2.2.2.

Wrong code selected during setup.

- Set up the remote control again for the device. Always test if the device responds, before leaving setup mode.

It may be that the buttons that you are trying to use have a different naming on the original remote control.

- Try out all buttons to find the one(s) you need.

The Teletext buttons do not work.

- Find out whether your TV is equipped with Teletext.
- Try improving the Teletext buttons. See chapter 2.2.2.
- Check whether you are using the correct button to switch on Teletext. For TV this is the  button.

4.1.3 Batteries

Will my settings be deleted when I replace the batteries?

No. All user settings will be retained in the remote control memory for 5 minutes.

Warning

The (included) batteries should not be exposed to excessive heat such as sunshine, fire or the like.

4.2 Need help?

We advise you to first read this user manual carefully. It is provided to help you set up and use the remote control.

If, however, you require extra information or have additional questions about setup, usage, spare parts, warranty, etc. of the SRP2002, you can always contact us.

When calling our helpline, make sure to have the SRP2002 at hand when you call, so that our operators can help you determine whether the SRP2002 is working properly.

You will find our contact details at the end of this user manual.

The model number of your Philips universal remote control is SRP2002/10.

(DB1) Brands only available from version DB1 onwards.
You can find the DB version on the sticker inside the battery compartment.

EN Information to the consumer

Compliance with EMF

Koninklijke Philips Electronics N.V. manufactures and sells many products targeted at consumers, which, like any electronic apparatus, in general have the ability to emit and receive electromagnetic signals.

One of Philips' leading Business Principles is to take all necessary health and safety measures for our products, to comply with all applicable legal requirements and to stay well within the EMF standards applicable at the time of producing the products.

Philips is committed to develop, produce and market products that cause no adverse health effects. Philips confirms that if its products are handled properly for their intended use, they are safe to use according to scientific evidence available today.

Philips plays an active role in the development of international EMF and safety standards, enabling Philips to anticipate further developments in standardization for early integration in its products.

Recycling and disposal

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC:

Never dispose of your product with other household waste. Please inform yourself about the local separate collection system for electrical and electronic products. Please act according to your local rules and do not dispose of your old products with your normal household waste. The correct disposal of your old product will help prevent potential negative consequences for the environment and human health.

Battery information

Your product operates on batteries covered by the European Directive 2006/66/EC, which cannot be disposed with normal household waste. Please inform yourself about the local rules on separate collection of batteries because the correct disposal will help prevent negative consequences for the environmental and human health.
