2.1 Portable DVD player

Your portable DVD player plays digital video discs conforming to the universal DVD standard. With it, you will be able to enjoy full-length movies with true cinema picture quality, and stereo or multichannel sound (depending on the disc and on your playback setup).

Handling discs

- 1 Do not touch the lens!
2 Do not use cleaning agents containing alcohol, ammonia, benzene, or abrasives as these may harm the player.
3 Apparatus shall not be exposed to dripping or splashing. Do not pour any liquid or moisture onto the apparatus (e.g. liquid food items, lit candles).

On handling the LCD screen

The LCD is manufactured using high precision technology. You may, however, see tiny black points and/or bright points (red, blue, green) that continuously appear on the LCD. This is a normal result of the manufacturing process and does not indicate a malfunction.

Environmental information

We have reduced the packaging to its minimum and made it easy to separate into more materials: cardboard, PS, PE and PET. Your set consists of material which can be recycled if disassembled by a specialized company. Please observe the local regulations to ensure proper recycling of batteries and old equipment.
