- Time and alarm backup for on-time wakeup even with power cut

Start the day your way

- Rise to radio or iPod/iPhone music via Lightning connector
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant wake up experience
- Sleep timer for easy falling asleep to your favorite music

PHILIPS

Clock radio for iPod/ iPhone
with Lightning connector for iPod/iPhone, FM, dual alarm, 2W

AJ3275D/12

Highlights

FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Play and charge via Lightning

Enjoy your favorite music while charging your iPod/iPhone via the new Lightning connector! Just dock it directly on the speaker to play your hand-picked tunes in superb sound. It also charges your device quickly while playing, so you don't have to work about the battery running out.

2W RMS

This system has 2W RMS total output power. RMS refers to Root Mean Square which is a

typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. The higher the wattage, the better the sound power emitted by the speaker.

Auto sync time

Auto sync time via iPod/iPhone dock with Lightning connector

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle

wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Sleep timer

Sleep timer lets you decide how long you want to listen to music, or a radio station of your choice, before falling asleep. Simply set a time limit (up to 1 hour) and choose a radio station to listen to while you drift off to sleep. The Philips radio set will continue to play for the selected duration and then automatically switch to a power-efficient and silent stand-by mode. Sleep Timer lets you fall asleep to your favourite radio DJ without counting sheep, or worrying about wasting power

Time and alarm backup

When there is a power failure, this intelligent clock will still maintain and keep its reliable time and your settings. The scheduled alarm remains active even when its display is off - all thanks to a pre-installed battery. When the power comes back on, there is no need to adjust the clock or reinstate settings. More amazingly, even if power supply is not restored, the battery provides enough energy for the buzzer to go off at the alarm time you have set - making sure you never wake up late.

Adjustable display brightness

Adjustable display brightness allows you to customize the display to your needs.

Clock radio for iPod/ iPhone
with Lightning connector for iPod/iPhone, FM, dual alarm, 2W

Specifications

iPhone compatibility

- Compatible with: iPhone 5

iPod compatibility

- Compatible with: iPod touch 5th generation, iPod nano 7th generation
