# Highlights

## **PAL & NTSC Progressive Scan**

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending fields with the odd lines to the screen first, followed by the fields with the even lines, both fields are written at one time. A flicker-free high resolution image is created giving you the best viewing experience.

## **RGB on Scart connectivity**

RGB on Scart is a cable connection that provides easy connectivity for high quality video output.

## **108MHz/12 bit video processing**

Video Upsampling is a technology that decreases distortion to dramatically improve picture quality. It is a technology that allows the normal 13.5MHz video signal to be up sampled to 8 times the frequency.

## **Multi-channel Super Audio CD**

Multi-channel SACD is a new generation music format that offers ultra high quality music reproduction. With a 5.1 multi-channel surround sound and full CD compatibility both forward and backward, what results is unsurpassed audio performance for your listening pleasure.

## **192kHz/24 bit audio DAC**

192KHz sampling enables you to have an accurate representation of the original sound curves. Together with a 24-bit resolution, more information is captured from the original analogue sound wave form, giving a much richer audio reproduction.

## **Built-in DD and DTS decoders**

A Built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an

astoundingly natural sense of ambience and dynamic realism.

## **Multi-format Movies with DivX**

Multi-format playability allows you to play most disc formats for maximum disc compatibility and viewing pleasure.

## **Music:SACDWindows Media™ Audio**

Multi-format playability allows you to play most disc formats for maximum disc compatibility and listening pleasure.

## **Picture CD with MP3 Playback**

Picture CD is a CD-R or CD-RW disc on which you can store your MP3 and digital pictures. When inserting a Picture CD in the DVD player, a screen menu will pop up, showing your JPEG's and/or MP3 files on the disc. Just select the music and pictures files you wish to enjoy and press play or OK. You can watch your pictures on TV with your music playing simultaneously.
