Power

- Batteries included
- Battery saving manager: Auto switch on/off
- Rechargeable

Setup

- Setup Method: on device

System specification

- Flash memory size: 8 MB

Highlights

7.1-cm full-colour screen

A 7.1-cm (240 x 320 pixels) full-colour LCD display provides high resolution quality and easy readability. The touch-sensitive screen shows only the keys you need and allows you to navigate quickly through the remote screen.

Activity-based control

Start your home entertainment activities with one touch of a button instead of controlling each individual device in separate steps. Simply press the activity button like 'Watch a movie' and the Prestigo will automatically switch on the different devices, such as the TV, DVD player and Home theatre system, to watch a movie.

Backlit keys

The illuminated keypad makes it easy to control all your devices, even in the dark.

Internet library

The Philips PrestigoSync software, together with the USB connector on the remote, provides access to easy online updates. You can select your favourite channel icons from the latest database library of 10,000+ channel icons. The Philips PrestigoSync software will also automatically inform you of the latest available firmware for your Prestigo. The software is provided on a CD-ROM or retrieved from the official Philips website.

Intuitive touch screen

A touch-sensitive screen that shows only the keys you need and allows you to navigate fast through the remote screen.

Direct favourite channel access

A library of channel icons for most countries' main TV and radio stations is available on the remote control. You can easily assign the right channel icons to the right channel via the colour LCD screen. Once set up, you flick through your favourite channels via the LCD screen using the station icons instead of the digit keys on your remote.
