Philips
DVD Micro Theater

Turn any room into a Theatre

A high quality component system flaunts a stylish and stunning design. Look no further than this 2.1-channel DVD Micro "Theater" system that offers everything you need for the finest music and movie experience.

Enrich your movie experience

- Play DVD, DivX®, (S)VCD, MP3-CD, WMA-CD, CD(RW) & Picture CD
- 12-bit/108MHz video processing for sharp, natural images
- · Progressive Scan component video for optimized image quality
- · Dolby Digital for ultimate movie experience

Enrich your sound experience

- Class 'D' digital amplifier for quality sound performance
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound
- · Loudness for bass and treble enhancement
- Total 100W RMS

Design that blends into your interior(s)

- High-end component design with stand
- · Elegant wood-finished speakers
- High quality remote control for comfortable use

Highlights

12-bit/108MHz video DAC

12-bit Video DAC is a superior Digital-to-Analogue-Converter that preserves every detail of the authentic picture quality. It shows subtle shades and smoother graduation of colors, resulting in a more vibrant and natural picture. The limitation of the usual 10bit DAC become in particular apparent while using large screens and projectors.

Progressive Scan

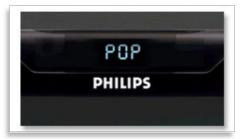

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

Class 'D' Amplifier

Class 'D' Digital Amplifier takes an analog signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output delivers all the advantages of digital audio, including

improved sound quality. In addition, Class 'D' Digital Amplifier has greater than 90% efficiency compared to traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can

enjoy consistent sound even when you turn down the volume.

Loudness for bass and treble

In the sound spectrum, high and low frequencies are relatively less audible to human ears - especially at low volumes. By activating the Loudness feature, the bass and treble will be amplified so you can savor a more balanced sound perception overall.

High-end component design

The component-designed DVD micro system comes with a stand that features four triangular feet. It can prevent any audio frequency distortion due to vibration, overheating and electromagnetic interference generated from the amplifier and DVD loader. The result is smooth and excellent and sound reproduction.

High quality remote Control

The remote control is a perfect balance of dimensions and weight. Sleek and ergonomically designed, the bottom cover of remote control features a soft rubber-paint finish to ensure comfort in usage.

Specifications

Sound

- Output Power: Total 100W RMS
- Sound Enhancement: Class "D" Digital Amplifier, Loudness, Digital Sound Control 4 modes, Dynamic Bass Boost
- Sound System: Dolby Digital

DVD Micro Theater

Loudspeakers

- Main Speaker: 2 way, Bass Reflex Speaker System,
 4" woofer, Speaker grilles detachable
- Subwoofer type: Passive

Video Playback

- Playback Media: DivX, DVD+RW, DVD-Video, Video CD/SVCD, Picture CD
- Video Enhancement: Progressive Scan
- Disc Playback Modes: Parental control, Angle, Zoom, Slow Motion, Dynamic Range Compression, PBC, A-B Repeat
- DVD Region.: 1

Audio Playback

- Playback Media: WMA-CD, MP3-CD, CD-RW, CD-R, CD
- Disc Playback Modes: 20-Track Programmable, Repeat/one/all/program, Shuffle Play
- · Loader Type: Motorised, Tray

Tuner/Reception/Transmission

- Tuner Bands: FM Stereo, AM
- · Auto digital tuning
- Station presets: 40

Connectivity

- Video Output Analog: Component Y Pb Pr (cinch), Composite CVBS (yellow cinch), S-Video (on Hosiden)
- Other connections: Digital audio coaxial out, Digital optical out, FM Antenna, AM Antenna, Subwoofer out
- · Aux in: 2x(L/R)/ RCA

Convenience

- Alarms: CD Alarm, Sleep timer
- · Clock: On main display
- · OSD Languages: English, French, Spanish
- Eco Power Standby: 1 watt
- Indications: DIM mode
- Display Type: VFD display

Accessories

- Included Accessories: Control cable, Composite video cable (Y), AM/FM Antenna
- Remote control: 49-key with 2xAAA batteries

Dimensions

- Set dimensions (W \times H \times D): 240 \times 160 \times 230 mm
- Main speaker dimensions (W x H x D): 145 x 230 x 218 mm
- Subwoofer dimensions (W \times H \times D): $180 \times 280 \times 330$ mm
- Packaging dimensions (W x H x D): 790 x 346 x 380 mm
- Weight incl. Packaging: 13 kg

Issue date 2009-07-17

Version: 1.0.3
