4000-series Black

Highlights

HQ-Sound

HQ-Sound: high quality acoustic engineering for superb sound reproduction. We build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything — high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Full-duplex echo cancellation

Natural conversation does not involve taking turns — there is always some natural overlap. Now, thanks to our full-duplex echo cancellation, you can hear perfectly, even if you are both talking at the same time.

MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear—to make voices sound crisper and clearer; Soft—for friendly, softer tones; Warm—to make voices sound welcoming and warm.

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

200-name phone book

Always have the phone numbers of your loved ones available: Save up to 200 names in your phonebook.

CD4953B/38

5.1 cm (2.0") black/white display

Easy to read, 5.1 cm (2.0") black on white display

Icon menu
