PHILIPS

Smart deadbolt

Built-in Bluetooth PIN code, key, and app unlock, ANSI/BHMA Grade 2, Works with the Philips Wi-Fi bridge

DDL240XG5KMB/37

Highlights

3 ways to unlock

Choose the unlock method that fits your lifestyle the moment you arrive home. You can choose from unlocking with PIN codes or keys, or just unlock the door with a gentle touch of the Philips Home Access app on your smartphone.

Built-in Bluetooth

Enable seamless and secure wireless communication between the smart lock and your smartphone or other compatible devices, allowing for convenient control and monitoring of your locks status via the Philips Home Access app.

Auto-lock

With built-in door sensors, the lock can automatically lock when you leave, keeping your

home safe and ensuring that you didn't forget to lock the door.

Lock activity records

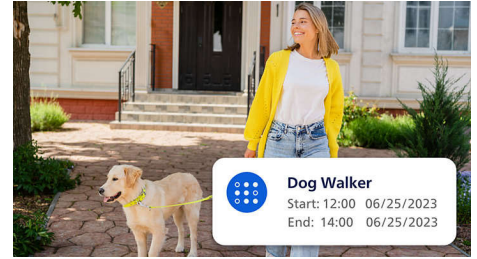

Lock activity records on the Philips Home Access app offer a detailed record of all lock interactions and activities. From lock/unlock events to user access, you can now effortlessly track who accessed your lock when you arrived home. By providing a clear and comprehensive overview of your lock's history, our smart lock ensures you're in control of your home's security.

Simple sharing

Share access with your family, so that they can also unlock the smart lock from the Philips Home Access app.

Generate temporary PIN codes

Generate PIN codes remotely through the Philips Home Access app for guests or a service technician. It can be a one-time PIN code which will delete upon using or a duration PIN code which will work repeatedly during a specific time period.

Works with Wi-Fi bridge

The smart deadbolt can work with a Philips Wi-Fi bridge (sold separately) which provides additional convenient features, such as voice commands, real-time unlock notifications, customized schedule PIN codes, etc.

Enhanced encryption

Enhanced encryption with AES 128 standard ensures that all communication between the smart lock and connected devices is highly secure, protecting your home from unauthorized access and cyber threats.
