- Store your receiver on the convenient docking station

Specifications

Sound

- Acoustic system: Closed
- Magnet type: Neodymium
- Frequency response: 20 20,000 Hz Hz
- Signal/noise ratio: > 86dB
- Speaker diameter: 40 mm
- **Tuner/Reception/Transmission**
- Automatic channel selection
- Effective range: 30 m
- Modulation: GFSK

Convenience

- Automatic power off
- Base Station Features: Power LED Indicator
- · Battery low indication
- Battery charging indication
- Operating time: ~10 hours

Accessories

- AC/DC Adapter: 5 V/550 mA DC
- · Battery charger: recharging docking station

Power

• Power supply headphone: 2 x AAA rechargeable

batteries

• Power supply transmitter: 6 V/ 550 mA DC

Packaging dimensions

- Type of shelf placement: Soother
- Packaging dimensions (W \times H \times D):
- Net weight: 0.567 kg
- Gross weight: 0.896 kg
- Tare weight: 0.329 kg
- EAN: 69 23410 71226 1
- · Number of products included: 1
- Packaging type: Soother

Outer Carton

- Outer carton (L x W x H): $32.5 \times 26 \times 32.5$ cm
- Net weight: 1.701 kg
- · Gross weight: 3.296 kg
- Tare weight: 1.595 kg
- Number of consumer packages: 3 • GTIN: 1 69 23410 71226 8

Product dimensions

- Product dimensions (W x H x D):
- 18.5 x 22 x 8.5 cm
- Weight: 0.179 kg

SHD8600/30

Highlights

2.4 GHz digital transmission

The 2.4 GHz digital transmission prevents compression and data loss between the transmitter and the headphones. The digital signals are converted to analogue signals at the end of the transmission process. The end-result is superb sound quality, with smooth acoustics and minimal data loss.

Acoustically tuned speakers

Acoustically tuned speakers produce pure, balanced sound with superb clarity and precision in both the high tones and deep bass levels.

Self-adjusting inner headband

The inner headband of these Philips headphones makes it easy to obtain a perfect fit for your head. The mechanism adjusts automatically for comfort.

Smart and quick charging The smart and quick charge feature enables the battery to be fully recharged within a very short time span. The remaining power capacity present in the battery is determined by an internal circuit, so that the incoming voltage can be optimised for a quick recharge while at the same time maximising the battery lifespan.
