# 1 Safety

Read and understand all instructions before you use your apparatus. If damage is caused by failure to follow instructions, the warranty does not apply.

- This apparatus is designed for negative ground (earth) 12 V DC operation only.
- To ensure safe driving, adjust the volume to a safe and comfortable level.
- Improper fuses can cause damage or fire. When you need to change the fuse, consult a professional.
- Use only the supplied mounting hardware for a safe and secure installation.
- To avoid short circuit, do not expose the apparatus to rain or water.
- Never insert objects into the ventilation slots or other openings on the apparatus.
- Clean the apparatus and frame with a soft, damp cloth. Never use substances such as alcohol, chemicals or household cleaners on the apparatus.
- Never place any objects other than discs into the apparatus.
- Never use solvents such as benzene, thinner, cleaners available commercially, or anti-static sprays intended for discs.
- Visible and invisible laser radiation when open. Avoid exposure to beam.

## Caution

- Use of controls or adjustments or performance of procedures other than herein may result in hazardous laser exposure or other unsafe operation.
- The apparatus shall not be exposed to dripping or splashing.
- Do not place any sources of danger on the apparatus (e.g. liquid filled objects, lighted candles).

## 3 Install the car audio system

### Caution

- Use the controls only as stated in this user manual.

Always follow the instructions in this chapter in sequence.

These instructions are for a typical installation. However, if your car has different requirements, make the adjustment accordingly. If you have any question regarding installation kits, consult your local retailer.

### Note

- This system is designed for negative ground (earth) 12V DC operation only.
- Always install this system in the car dashboard. Other locations can be dangerous as the rear of the system heats up during use.
- To avoid short-circuit: before you connect, make sure that the ignition is off.
- Make sure that you connect the yellow and red power supply leads after all other leads are connected.
- Make sure that all loose leads are insulated with electrical tape.
- Make sure that the leads do not get caught under screws or iron parts that will move (e.g. seat rail).
- Make sure that all ground (earth) leads are run to a common ground (earth) point.
- Use only the supplied mounting hardware for a safe and secure installation.
- Improper fuses can cause damage or fire. When you need to change the fuse, consult a professional.
- When you connect other devices to this system, make sure that the rating of the car circuit is higher than the total fuse value of all the connected devices.
- Never connect speaker wires to the metal body or chassis of the car.
- Never connect speaker wires with stripes to one another.

## Connect wires

### Note

- Consult a professional to connect the unit as instructed below.

- Check the car's wiring carefully and connect them to the the male connector:

	ISO male connectors	Connect to
a	Green strip, black-edged green strip	Left speaker (Rear)
b	White strip, black-edged white strip	Left speaker (Front)
c	Gray strip, black-edged gray strip	Right speaker (Front)
d	Purple strip, black-edged purple strip	Right speaker (Rear)
e	Red	Ignition key +12V DC when ON/ACC
f	Blue	Motor/electric antenna relay control lead
g	White edged blue strip	Amplifier relay control lead
h	Black	Ground
i	Yellow	To the +12V car battery which is energized at all times

- Connect the antenna and amplifier as illustrated, if applicable.

	Connector	Connect to
1	ANTENNA	Antenna
2	Socket for ISO male connectors	As indicated in Step 1 above
3	REAR LINE OUT R (Socket)	Rear right speaker
4	REAR LINE OUT L (Socket)	Rear left speaker
5	OE REMOTE (Purple)	OE Remote
6	OE REMOTE (Black strip)	Ground

### Tip

- The pin arrangement for the ISO connectors depends on the type of vehicle you drive. Be sure to make proper connections to prevent damage to the unit.

## Mount into the dashboard

- 1 If the car does not have an on-board drive or navigation computer, disconnect the negative terminal of the car battery.
  - If you disconnect the car battery in a car that has an on-board drive or navigation computer, the computer may lose its memory.
  - If the car battery is not disconnected, to avoid short-circuit, ensure that the bare wires do not touch each other.
- 2 Ensure that car dashboard opening is within these measurements:

- 3 Remove the mounting sleeve with the supplied disassembly tools.

- 4 Install the sleeve into the dashboard and bend the tabs outward to fix the sleeve.

### Note

- If the unit is not fixed by sleeve but by the supplied screws, skip this step.

- 5 Place the supplied rubber cushion over the end of the mounting bolt.

- 6 Slide the unit into the dashboard until you hear a click sound.

- 7 Reconnect the negative terminal of the car battery.

## Attach the front panel

- 1 Insert the notch on the front panel to the chassis on the main unit.

- 2 Press the left end of the front panel inwards until it is securely locked with a "click".

## Detach the front panel

### Note

- Before you detach the front panel, make sure that the system is turned off.

- 1 Press  to release the front panel.
- 2 Pull the front panel outwards to remove it.

## Care of the environment

### Disposal of your old product

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

This symbol on a product means that the product is covered by European Directive 2012/19/EU. Inform yourself about the local separate collection system for electrical and electronic products. Follow local rules and never dispose of the product with normal household waste. Correct disposal of old products helps prevent negative consequences for the environment and human health.

### Environmental information

All unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet.) Your system consists of materials which can be recycled and reused if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.
