Highlights

SVGA snapshot resolution

The SVGA resolution of your snapshots ensures sharp images for use in documents, webpages and e-mails.

30 frames per second video

Sit back and enjoy superior viewing with 30 frames per second video. This gives you smoother video images and a better all-round video-chatting experience.

Works with all IM services

Add video to Yahoo!, MSN and AOL Messenger. This PC Camera also works with Windows Messenger and NetMeeting.

Built-in digital microphone

The built-in digital microphone allows you to talk naturally and freely or to add sound to a video clip recording.

Get into the game

With motion-triggered video and the bundled interactive games software, this webcam adds to your enjoyment of interactive gaming. See yourself in the game!

USB docking station

When you're not using your PC camera, it can be removed from the base to give you an easy to reach USB port right next to your PC.

VLounge software

Software for capturing, managing and archiving snapshots and video clips in a very convenient way. With just a couple of mouse clicks you will be able to create and send Video mails. This software package provides all you need to take full advantage of your Philips PC Camera.

VLounge QuickLaunch button

To start up the VLounge application, simply press the QuickLaunch button

Snapshot button

With just one press of this button, your webcam takes a picture automatically. It's a fun way to share your pictures by adding them to e-mails, web pages or documents.

Rotating lens

Rotating lens for perfect aiming and natural images. You can get the right camera angle quickly and easily without having to put things underneath it to change the tilt.
