PHILIPS

Highlights

Play DVD, DivX and MPEG4

With DivX[®] support, you are able to enjoy DivX[®] encoded videos in the comfort of your living room. The DivX[®] media format is an MPEG4-based video compression technology that enables you to save large files like movies, trailers and music videos on media like CD-R/RW, memory cards and DVD-video. DivX[®]

CDs can be played back on selected DVD players, DVD Recorders and Home Theatre Systems.

MP3-CD, CD and CD-RW music

MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without

radically degrading their audio quality. A single CD can store up to 10 hours of music.

Share picture CD (JPEG)

Multi-format playability allows you to view images on the go and play most disc formats for maximum disc compatibility and viewing pleasure.
