# Highlights

### Philips sound signature

From the taut, controlled bass to the warm mids and sparkling highs, these superb earbuds bring you exquisite natural sound with precise instrument separation. Balanced-armature and graphene-coated dynamic drivers paint more detail than ever. You'll hear the tracks your favourite artists made—just the way they made them.

### Noise Cancelling Pro+

Adaptive noise cancelling quickly adjusts to your environment to suppress outside noise, including wind, in real time. Music to calls, you can immerse yourself wherever you are without lifting a finger. If you do want to adjust the level of transparency or wind-noise reduction, simply use the Philips Headphones app.

### Superior call quality

You can happily make calls from the busiest, noisiest locations. Beamforming mics focus on the sound of your voice while advanced AI

algorithms stop background noise from ruining the call. If it's really windy, the bone-conduction sensor will reliably pick up your voice, so you'll still be heard.

### Timeless Fidelio design

Every element of your Fidelio earbuds is carefully considered. The polished ceramic housing of each earbud blends beauty with durability, and an IPX4 rating means they don't mind rain. Soft Muirhead leather accents the buds and the curved, compact charging case, which is made from anodised aluminium.

### Next-generation Bluetooth

These earbuds will work with devices that support Bluetooth LE Audio and the LC3 codec. You'll get noticeably better sound and a steadier connection that doesn't dip in built-up areas. There's virtually no lag for films or gaming, and you're all set for shared listening over wireless networks with Auracast broadcasting.\*

### Superb sound for streaming

AAC, LDAC and LC3 codecs are supported for a superb sound on any streaming service, and the music pauses if you take an earbud out. Advanced Bluetooth multipoint seamlessly switches back and forth between two devices: listen to music on your laptop, take a call on your phone, and go back to your music automatically.

### 36 hours play time with case

Listen for up to 36 hours with ANC on, or 40 hours with ANC off. You get up to 9 hours of play time from a full charge, and a quick ten-minute charge of the earbuds in their case will get you another hour and a half. You can recharge the case by placing it on any wireless Qi charger.

### Philips Headphones app

For music and podcasts, four presets and a custom multi-band equalizer let you find your preferred sound. You can also use the app to turn adaptive noise cancelling off and take control yourself.
