Philips
Micro music system

100W
Bluetooth®
with MULTIPAIR
CD, MP3-CD, USB Direct, FM

BTM5120

Relax with great music

The Philips micro music system with Multi-device Bluetooth® streaming, MP3 playback through USB Direct and audio-in for other systems are all supported. Powerful speakers with basspipes upscaling pump up your home entertainment experience.

Enjoy your music from multiple sources
- Stream music over Bluetooth® with multi-device pairing
- Play MP3-CD, CD and CD-R/RW
- USB Direct for easy MP3 music playback
- Audio-in for portable music playback
- Digital tuning with preset stations for extra convenience

Enrich your sound experience
- 100W RMS total output power
- Bass Reflex Speakers deliver deep and powerful bass
- Digital Sound Control for optimized music style settings

Easy to use
- FM digital tuning to preset up to 20 stations

PHILIPS

Highlights

Multi-device pairing

Wireless Bluetooth® sound transmission is increasingly common in the world of sound systems, but most Bluetooth® compatible systems allow just one device to connect at a time. Multi-device pairing lets you pair up to three devices and switch between them instantly.

Bass Reflex Speakers

A chamber behind the speaker driver that channels air to acoustically tuned vents built into the speaker give the bass notes a more punchy, realistic sound.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Balance, Clear, Powerful, Warm and Bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Play MP3-CD, CD and CD-R/RW

MP3 stands for "MPEG 1 Audio layer-7.6 cm (3") .MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. MP3 has become the standard audio compression format used on the world wide web, allowing quick and easy audio file transfer.

Specifications

Sound
• Sound Enhancement: Digital Sound Control
• Maximum output power (RMS): 100W
