- Handset dimensions: 140 x 46 x 25 mm

Highlights

Digital answering machine

With a digital answering machine, you'll never miss a call or message.

15-minute recording time

Records up to 15 minutes of incoming messages

Illuminated message-counter

Just look at the base station to instantly know whether you have received any messages.

SIM-card copying facility

With the SIM-card copying facility, you can transfer your whole mobile-phonebook on to your home telephone in a matter of seconds.

Keep in touch by SMS texting

The SMS is a simple way to exchange information over the telephone line. You first type your text off-line and when you are ready, you send it to as many people as you like.

Caller name & number display

The name of the person or company calling is shown on the telephone display. The names of first-time callers can be displayed as well as those that are programmed into the telephone beforehand.

Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

Backlit display & keypad

Backlit display & keypad ensures easy viewing and operation in low light conditions
