Plays all kinds of discs

- Plays CD, CD-R and CD-RW discs

PHILIPS

Technical specifications

Sound

- Output power (RMS): 2 x 4 mW
- D/A convertor: 1-bit
- Sound enhancement technology:
Dynamic Bass Boost
- Volume control: Digital
- Signal to noise ratio: >82 dB
- Frequency response: 20 Hz-20 KHz
- Audible feedback

Audio Playback

- Disc playback media: CD, CD-R, CD-RW
- Disc playback mode:
30-Track Programmable,
Fast Forward/Backward, Repeat Play,
Shuffle Play, Scan, Hold,
Resume (Resume Playback from stop)
- Electronic Skip Protection (CD): 45 seconds

Connectivity

- Headphone: 3.5 mm
- Line out: 3.5 mm
- DC in: 4.0 mm, 4.5 v, centre '+'

Convenience

- Display type: LCD
- Indications: CD functions, Track, Time, DBB, ESP, Battery status

Accessories

- Headphones:
Stereo in-ear headphone (AY3806)
- User manual

Dimension (basic version /00)

- Master carton dimensions (WxHxD):
394 x 181 x 171 mm
- Master carton quantity: 6
- Master carton weight: 3 kg
- Packaging dimensions (WxHxD):
157 x 64 x 153 mm
- Packaging type: D-box
- Product dimensions (WxHxD):
140 x 27.5 x 140 mm
- Product weight: 0.2 kg
- Weight incl packaging: 0.45 kg

Power

- Batteries type: AA/LR6/UM3 cell
- Battery playing time CD: 20 hours
(2 x AA alkaline batteries, ESP Off)

Product highlights

Electronic Skip Protection

Electronic Skip Protection (ESP) is an intelligent electronic buffer that guarantees uninterrupted music listening. Music is constantly fed into the player's memory buffer during playback, allowing you to continue to experience uninterrupted sound in the event of knocks, shakes or jolts to the set - accidentally or during sports. When shocks occur, music is released from the buffer while the laser promptly refocuses to the point at which the shock occurred and recommences playing to refill the buffer. ESP ensures smooth, skip-free music listening on your CD player while on the move!

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

CD-Rewritable compatible

CD-Rewritable compatible means that your audio set can play both CD-Recordable (CD-R) and CD-Rewritable (CD-RW) discs. CD-R discs are recordable once and can be played on any audio CD player while CD-RW discs can be recorded and rewritten multiple times and can only be played back on compatible audio CD players. The laser pick-up and CD decoder circuitry of CD-RW compatible players are specially designed to read the special audio CD-RW phase-change recording layer, ensuring you can always play your home-recorded discs on your audio CD system.
