Enjoy the view

The Philips D250 Cordless Phone packs HQ Sound and a large, clear display into a sleek, ergonomic design. Enjoy smart privacy modes, great comfort and sound—all in an easy, handsfree style.

Nice and simple

- Easy to read 4.6 cm (1.8") display with white backlight
- Freestanding handset with a speaker for easy hands-free calls
- Textured back cover for non-slip grip
- Programmable hot keys for quick dial
- Up to 16 hours of talk time on a single charge
- Privacy settings: call block and call barring
- Caller ID – so you always know who is calling*

Crystal clear sound

- Advanced sound testing and tuning for superb voice quality
- Optimised antenna layout for great reception in any room
- The Parametric Equaliser delivers pure and clear sound

Eco-conscious product

- Zero power emission when ECO+ mode is activated

PHILIPS

Highlights

4.6 cm (1.8") display

Easy to read 4.6 cm (1.8") display with white backlight

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialling, you will never have to search for their number again. You can programme up to 2 keys for instant calling.

Up to 16 hours talk time

Up to 16 hours of talk time on a single charge

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.

Optimised antenna layout

Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult.

Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equaliser

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Multiple privacy settings

Value your privacy and quiet time at home? Black List restricts specific numbers or those starting with certain digits, protecting you from receiving unwanted calls. You can choose to block up to 4 sets of numbers. Each set can consist of 1 to 24 digits. If the number of an incoming call starts with any of these number sets or are the exact numbers that you choose to block, your phone will not ring. With Call Barring, you can avoid the surprise of expensive phone bills by blocking calls from specific numbers starting with certain digits (for example, pay per call numbers).

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment. The level of radiation emitted is reduced by up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

Specifications

Convenience

- Menu structure in the handset: List Menu
- Speakerphone — talk hands-free
- Call barring: Restrict the phone from ringing on specific incoming numbers
- Signal strength indicator: 3 bar indicator
