- VIP outgoing message
- Call screening

Memory Capacity

- **Name & number shared phonebook:** 250 names and numbers
- **SMS download capacity:** 60
- **Call log entries:** 40

Product highlights

Ringtone download

This function offers the possibility to personalise your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as you would any other ringtones (country and network dependent).

Eatoni text editor

Eatoni's LetterWise is an easy to use text entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Personal mail boxes

DECT phones provide up to 9 personal SMS mail boxes which can be protected by a PIN code - SMS can stay private despite collective phone usage. Just tell your correspondents your mail box number so that they can send short messages directly to this personal mail box.

Downloadable outgoing messages

This function gives you the possibility to download specific outgoing messages for your answering machine. Simply call the dedicated service provider and select your favourite outgoing message. This message will be recorded on the answering machine by the service provider (country and network dependent).

Colour screen

The colour screen adds more fun and excitement by enriching messages and other features. The large colour display can show up to 6 lines of text with a 4k pixel resolution. Colour also makes your phone easier to use: menus and sub-menus are easily read and icons are easily identified, allowing any desired applications and functions to be located and selected quickly and easily.

White backlight

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark.

Easy answer phone control

Specific Outgoing Messages
