Move freely while calling

Hands-free phone with crystal clear sound

The lightweight and portable Philips hands-free phone is the ideal companion for any DECT phone to make and receive calls when your hands are busy. Enjoy calls in loud, crystal clear sound and the simplicity of the intuitive touch screen.

Make longer calls doing whatever you like

- Mic and speaker tuned for crystal-clear hands-free calls
- Hands-free speaker mode or headphones privacy
- Wear it clipped, on a lanyard or place it next to you

Universal compatibility

- Compatible with virtually all DECT cordless phones

Fully featured phone with touch screen controls

- Fast and easy touchscreen controls
- See who is calling with Caller ID
- Phonebook stores 20 numbers and call log tracks 30 calls
- Make longer conversations; up to 10 hours talk time
- Less charging with up to 160 hours standby time

Eco-conscious design

- 60% reduction of radiation when ECO mode is activated

PHILIPS

sense and simplicity

Hands-free accessory for cordless phones
Universal compatibility

Highlights

Crystal-clear hands-free sound

The Philips hands-free phone delivers loud, crystal-clear sound through its high performance speaker with a sealed acoustic chamber. Tuned for hands-free mode, it delivers a far crisper, louder sound than any mobile or DECT phone you may be used to.

Compatible with DECT phones

The Philips hands-free DECT phone is GAP (Generic Access Profile) compatible, which means you can simply register it with your phone base to take incoming calls and make outgoing ones.

Intuitive touch screen

Calling is more enjoyable than reading long user manuals. That's why the Philips hands-free phone comes with a resistant, touch-sensitive screen to dial, take calls and easily manage your settings.

Clip, lanyard or table-top

Clip, lanyard or freestanding mode: Unlike traditional DECT phones in hands-free mode, the Philips hands-free phone is sufficiently lightweight and compact to be your constant companion. You can wear it as a clip, on a lanyard or placed next to you as a loud speaker — leaving your hands and ears free to do other things as well as talk for much longer.

Headphones or speaker options

You can use headphones with the Philips hands-free phone to ensure total privacy whilst retaining the benefits of true hands-free communication. Whenever you prefer to keep your conversation private, simply switch from speaker mode by plugging your headphones into the standard 3.5 mm jack and continue to enjoy hands-free convenience.

10 hours talk time

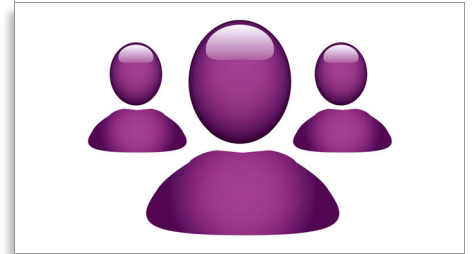

Maximum Talk time: With up to 10 hours of talk time, you'll never need to cut your calls

MT3120T/12

short again; and what's more, the greatly improved battery life means you won't need to recharge your phone so often.

See who's calling — Caller ID
