- Up to 10 hours play time and easy USB-C charging
- Relax and catch up. Clear calls via the headphones

PHILIPS

Sleep headphones

Soft, thin sleep buds Intelligent noise masking, Sleep monitoring, Kokoon companion sleep app

Highlights

World's thinnest sleep buds*

These soft, super-thin sleep buds sit snug within the ear and are suitable for all sleeping positions, including side sleepers. Each earbud loops over your ear so it won't fall out if you move, and you get five sizes of extra-soft silicone ear tips so you can find the fit that's right for you.

Kokoon sleep app

Listen to sounds endorsed by science to help you fall asleep easier—and wake to helpful insights on your sleep quality. The app's soothing sounds include meditations, soundscapes, binaural beats, and more. Not sure what to try? The app can help you understand which sounds work best for you.

Powerful biosensors

Powerful biosensors detect when you're falling asleep, and the audio you're listening to will

automatically fade away as you drift off. These same biosensors also let you monitor your sleep, so you can track your patterns in the Kokoon app and improve your sleep habits over time.

Intelligent noise masking

Noisy neighbors, a snoring partner, or traffic disturbing your sleep? These sleep buds can help. Once the biosensors detect that you're sleeping, white or colored noise is played to mask out external sounds. Use the Kokoon app to select the type of masking sound you want, or turn it off altogether.

Balanced-armature drivers

These sleep buds boast balanced-armature drivers specially designed to bring you clear sound while maintaining the barely-there feel of each earbud. Combined with excellent passive noise isolation, courtesy of the snug fit, you can let the world fade away as you relax with your sounds.

TAN7808GY/00

Handy control unit

Carefully positioned so it gently hugs the nape of your neck, the neckband control unit is curved and clad in soft material so it's comfy in any sleeping position. The unit's multifunction button lets you adjust the volume or pick up calls—if you're still awake!

Solid Bluetooth connectivity

Want to fall asleep to music or an audiobook on the beach? These sleep buds will stream content from any platform, and you can blend what you hear with Kokoon's soundscapes. Simply keep the Kokoon app open to hear a crackling fire or distant surf as you listen to the next tune, or chapter.

Sleep insights

Get more from your days when you get more from your nights! The Kokoon app gives you daily insights into your sleep, so you can determine what factors affect its quality and make simple tweaks to your routine. After a free trial, the app is available for a monthly subscription.*

Up to 10 hrs playtime

You get 10 hours play time from a full charge, plenty to see you through the night. The earbuds can be recharged fully in 2 hours via a USB-C cable plugged into the control unit, and the included carrying pouch keeps the buds safe when not in use.
