! Important safety instructions

Warning

- The electrical network is classified as hazardous. The only way to power down the charger is to unplug the power supply from the electrical outlet. Ensure that the electrical outlet is always easily accessible.
- Refer to safety information before using the product.
- Hereby, TP Vision Europe B.V. declares that the product is in compliance with the essential requirements and other relevant provisions of RED Directive 2014/53/EU and UK Radio Equipment Regulations SI 2017 No 1206. You can find the Declaration of Conformity on www.philips.com/support.
- Use only the power supply listed in the user instructions.
- Use only the batteries listed in the user instructions.
- Do not allow the product to come into contact with liquids.
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.
- When the handset rings or when the handsfree is activated, keep the handset away from your ear to avoid hearing damage.
- SAR value <0.1 W/kg

Care of the environment

Disposal of your old product and battery

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

This symbol means the product must not be discarded as household waste and should be delivered to an appropriate collection facility recycling.

This symbol means that the product contains batteries covered by European Directive 2013/56/EU which cannot be disposed of with normal household waste.

Information on the safety of users and non-users:

Compliance with specific usage restrictions on certain places (hospitals, planes, petrol stations, schools...). Precautions to be taken by electronic implants wearers (cardiac stimulators, insulin pumps, neurostimulators...), concerning in particular the distance between the radio equipment and the implant (15 centimeters in the case of the strongest sources of exposure such as mobile phones).

Information on the behaviors to follow to reduce exposure to radiation emitted by equipment:

Use your device in good reception conditions to reduce the amount of radiation received. Make reasoned use of radio equipment, such as mobile phones by children and teens, for example by avoiding night-time communications and limiting the frequency and duration of calls. Keep radio equipment away from the womb of pregnant women. Keep radio equipment away from teenagers' lower abdomens.

To access the user instructions online, use the reference model number written on the product label at the bottom of the base station.

? Frequently asked questions

1. My telephone does not work at all.

Make sure the telephone base is installed properly, and battery is installed and charged correctly. For optimum daily performance, return the handset to the telephone base after use.

2. I cannot hear the dial tone.

Disconnect the telephone line cord from your telephone and connect it to another telephone. If there is no dial tone on that other telephone either, then the telephone line cord may be defective. Try installing a new telephone line cord.

If changing the telephone line cord does not help, the wall jack (or the wiring to this wall jack) may be defective. Contact your telephone service provider.

You may be using a new cable or VoIP service, the existing telephone jacks in your home may no longer work. Contact your service provider for solutions.

3. I cannot dial out.

Make sure there is a dial tone before dialing. It is normal if the handset takes a second or two to synchronize with the telephone base before producing a dial tone. Wait an extra second before dialing.

Eliminate any background noise. Mute the handset before dialing, or dial from another room in your home with less background noise.

4. No display

- Make sure the batteries are charged.
- Make sure there are power and phone connections.

5. The handset does not ring.

Make sure the handset ringtone is turned on.

6. The caller ID does not display.

- The service is not activated. Check with your service provider.
- The caller's information is withheld or unavailable.

7. No signal bar is displayed on the screen.

If the handset displays [REGISTER], register the handset (see the section on "Register additional handsets" in 4 Enjoy). If the handset does not display [REGISTER], move it closer to the telephone base because the handset is out of range.

8. I failed to pair (register) an additional handset to the base.

Your base memory is full because each telephone base accommodates up to 4 cordless handsets. Deregister the unused handsets, and then try again.

Note

- You can install a DSL (digital subscriber line) filter to prevent noise and caller ID problems caused by the DSL interference.
- You can find the Declaration of Conformity on www.philips.com/support
