- Sleep timer for easy falling asleep to your favorite music

Easy to use

- Smartly designed FlexiDock to fit any Android phone
- Easy Bluetooth pairing Widget for Android phone
- Charge second mobile device via USB port

PHILIPS

Highlights

FlexiDock

The improved version of Philips FlexiDock features a micro USB connector, perfect for any Android powered phone. The docking mechanism is a great fit for any Android phone, thanks to the smooth and rounded edge design of the connector. It offers maximum adjustability. Simply slide the connector left or right, or rotate it to fit any location or orientation of the Micro USB port on your phone. This extreme flexibility is the first of its kind, catering to Android powered phones that are made by different manufacturers with no standardized position and orientation for the micro USB connector.

Wireless music streaming

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to iPod/iPhone/iPad or other Bluetooth devices, such as

smartphones, tablets or even laptops. So you can enjoy your favorite music, sound from video or game wireless on this speaker easily.

Easy Bluetooth pairing Widget

Available for download from Google Play, the Philips Bluetooth Audio Connect widget allows you to connect and pair your mobile device to any Philips Bluetooth audio device easily. Tap the widget to automatically add, pair and connect to any Philips Bluetooth audio device. Once paired, you can also rename and change the icons. This widget allows you to have several Philips audio devices, making it easy for you to switch between different Bluetooth devices easily. Simply tap to select your desired Philips audio device and start streaming.

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you

up and the other time to wake up your partner.

AUDIO-IN (3.5mm)

Make one easy connection and enjoy all your music from portable devices and computers. Simply plug your device to the AUDIO-IN (3.5 mm) port on your Philips set. With computers, the connection is typically made from the headset output. Once linked, you can enjoy your entire music collection directly, on a set of superior speakers. Philips simply delivers better sound.
