- Packaging width: 87 mm
- Product weight: 0.085 kg
- Main unit depth: 74 mm
- Main unit height: 80 mm
- Main unit width: 85 mm

Highlights

Alarm Time Display

Alarm Time Display always shows both the current time and the time that your alarm is set to go off. The constant display eliminates the need to press a button in order to check whether the alarm has been set and at what time it will go off. Alarm Time Display constantly reassures you that your alarm is set correctly and that it will wake you up at the intended time.

Handy size for easy carrying

This handy alarm clock offers accurate time and alarm functions in a compact form. It is small enough to be placed anywhere at home or in the office, or you can take it along with you whenever you travel.

Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

Low power consumption

Thanks to its simple clock and alarm functions, and the auto-off LED backlight, power consumption is low. A single AA battery is all that is required to power the clock for about a year.

Month and day display

The clock has a built-in calendar function that displays the current month and day. Set the correct date (including the year), and the calendar will remember to take into account the leap years as they occur.

One-battery for travel

The clock is powered by a single AA battery, offering a compact and lightweight solution for travel. To enjoy the full functions of the clock, alarm and calendar, simply insert a AA battery into the battery case. AA batteries are widely available in the market making replacement easy when on the road.

Repeat alarm (5-minute)

To counter oversleeping, the Philips Clock radio has a snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat Alarm button once and go back to sleep. Five minutes later the alarm will ring again. You can continue to press the Repeat Alarm button every five minutes until you turn off the alarm altogether.

Simple alarm and time setting

The time and alarm are so easy to set up that referring to the Quick Start Guide or user manual may not be necessary. Simply refer to the Clock radio's silkscreen buttons to set the time and alarm.
