Product highlights

Baby-sit function

Worried about your baby not sleeping? No need to constantly go and check in his bedroom. The baby-sit mode allows you to keep an ear on him wherever you are in the house.

Free intercom

No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

Full graphic colour display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom of communication from your home. Now you can combine text with images or numbers.

Selectable wallpapers

An illustration is worth more than a thousand words. Scroll through the selection of images integrated into the handset. Select the one that best suits your mood of the day and have it displayed as a background on your screen.

Hands free on handset

The hands free speaker phone lets you hold a conversation while you're busy doing something else. With both the speaker and the microphone in front of the handset, it is just like talking face to face with your correspondent.

Polyphonic ringtones

A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.
