# General Information/Maintenance

#### Features

Your DVD Mini Hi-Fi System with 5.1-channel full analog amplifier creates the same dynamic sound qualities that you find in full-fledged cinemas and incorporates some of the best features in home theater technology.

#### Other features include:

# Built-in DTS and Dolby Digital decoder, supporting virtual surround and stereo.

Bullt-In Dolby Digital decoder,supporting virtual surround and stereo.

#### **Additional Component Connections**

Lets you connect other audio and audio/visual components to the system so you can use the system's speakers.

#### Night mode

Lets you compress the dynamic range, reducing the difference in loudness between different sounds in Dolby Digital mode.

#### Parental control (rating level)

Lets you set a rating level so that your children cannot watch a DVD that has a rating higher than you set.

#### Sleep timer

Enables the system to switch to standby mode automatically at a preset time.

## **Discs for playback**

#### Your DVD Mini Hi-Fi System will play:

- Digital Video Discs (DVDs)
- Video CDs (VCDs)
- SuperVideo CDs (SVCDs)
- Digital Video Discs + Rewritable (DVD+RW)
- Compact Discs (CDs)
- Picture (Kodak, JPEG) files on CDR(W)
- DivX(R) disc on CD-R(W):
- DivX 3.11, 4.x and 5.x
- WMA
- Supported MP3-CD format.
- ISO 9660 / UDF format
- Max.title/album name –12 characters Max.title number plus album is 255.
- Max. nested directory is 8 levels.
- The max. album number is 32.
- The max. MP3 track number is 999.
- Supported sampling frequencies for MP3 disc: 32 kHz, 44.1 kHz, 48 kHz.
- Supported Bit-rates of MP3 disc are: 32, 64, 96, 128, 192, 256 (kbps).
- Following formats can't be supported

- The files like \*.VMA, \*.AAC, \*.DLF, \*.M3U, \*.PLS, \*.WAV
- Non-English Album/Title name
- The discs recorded under Joliet format

#### **Region codes**

DVDs must be labeled for **ALL regions** or for **Region 4** in order to play on this system. You cannot play discs that are labeled for other

regions.

#### Notes:

 For mixed mode discs, only one mode will be selected for playback according to the recording format.

 If you are having trouble playing a certain disc, remove the disc and try a different one.

Improperly formatted discs will not play on this system.

## Supplied accessories

- Composite video cable (yellow)
- Component video cables (red/blue/green)
- Audio cables (white, red)
- FM wire antenna
- MW loop antenna
- Remote Control with two AA batteries
- AC power cable

 This instruction booklet and a Quick Use Guide

## **Environmental information**

Any unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet).

Your system consists of materials which can be recycled and reused if disassembled by a specialised company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.

## Care and safety information

# Avoid high temperatures, moisture, water and dust

- Do not expose the system, batteries or discs to humidity, rain, sand or excessive heat (caused by heating equipment or direct sunlight). Always keep disc trays closed to avoid dust buildup on the lens.
- No objects filled with liquids, such as vases, shall be placed on the apparatus.
- No naked flame sources, such as lighted candles, should be placed on the apparatus.

#### Avoid condensation problem

 The lens may cloud over when the player is suddenly moved from cold to warm surroundings, making it impossible to play a disc. Leave the player in the warm environment until the moisture evaporates.

#### Do not block the vents

 Do not operate the system in an enclosed cabinet and allow about 10 cm (4 inches) of free space all around the player for adequate ventilation.

 The ventilation should not be impeded by covering the ventilation openings with items, such as newspapers table-cloths, curtains, etc.

#### Cleaning the cabinet

 Use soft cloth slightly moistened with a mild detergent solution. Do not use a solution containing alcohol, spirits, ammonia or abrasives.

#### **Cleaning discs**

- To clean a CD, wipe it in a straight line from the center towards the edge using soft and lint-free cloth. A cleaning agent may damage the disc.
- Write only on the printed side of a CDR(W) and only with a soft felt-tipped pen.
- Handle the disc by its edge. Do not touch the surface.

#### Cleaning the disc lens

 After prolonged use, dirt or dust may accumulate at the disc lens. To ensure good playback quality, clean the disc lens with Philips CD Lens Cleaner or any commercially available cleaner: Follow the instructions supplied with cleaner:

#### Finding a suitable location

Place the player on a flat, hard, stable surface.

# **General Information/Maintenance**

#### Cleaning the head and the tape paths

- To ensure good recording and playback quality, clean the head (A), the capstan(s) (B), and pressure roller(s) (C) after every 50 hours of tape operation.
- Use a cotton swab slightly moistened with cleaning fluid or alcohol.
- You also can clean the head by playing a cleaning tape once.

#### Demagnetising the head

Use a demagnetising tape available at your dealer.

- Don't expose the system to dripping or splashing.
- Install this unit near the AC outlet and where the AC Power can be reached easily.
- When the system is switched to standby mode, it is still consuming some power. To disconnect the system from the power supply completely, remove the AC power plug from the wall sockets.

## **Hearing Safety**

#### Listen at a moderate volume.

 Using headphones at a high volume can impair your hearing. This product can produce sounds in decibel ranges that may cause hearing loss for a normal person, even for exposure less than a minute. The higher decibel ranges are offered for those that may have already experienced some hearing loss.

 Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes

of sound. So after prolonged listening, what sounds "normal" can actually be loud and harmful to your hearing. To guard against this, set your volume to a safe level before your hearing adapts and leave it there.

#### To establish a safe volume level:

• Set your volume control at a low setting.

 Slowly increase the sound until you can hear it comfortably and clearly, without distortion.

# Listen for reasonable periods of time:

 Prolonged exposure to sound, even at normally "safe" levels, can also cause hearing loss.

• Be sure to use your equipment reasonably and take appropriate breaks.

#### <u>Be sure to observe the following</u> guidelines when using your headphones.

 Listen at reasonable volumes for reasonable periods of time.

 Be careful not to adjust the volume as your hearing adapts.

• Do not turn up the volume so high that you can't hear what's around you.

 You should use caution or temporarily discontinue use in potentially hazardous situations.

 Do not use headphones while operating a motorized vehicle, cycling, skateboarding, etc.; it may create a traffic hazard and is illegal in many areas.

## Step 1: Placing speakers and subwoofer

For best possible surround sound, all speakers (except subwoofer) should be placed at the same distance from the listening position . Place the front left and right speakers at equal distances from the TV set and at an angle of approximately 45 degrees from the listening position.

- place the center speaker above the TV set or the system so the center channel's sound is localized.
- Place the surround speaker at normal listening ear level facing each other or mounted on the set.
- Place the subwoofer on the floor near the TV set.

#### Notes:

 To avoid magnetic interference, do not position the front speakers too close to your TV set.
 Allow adequate ventilation around the DVD Mini Hi-Fi System.

#### **IMPORTANT!**

The type plate is located on the rear of the system.

To avoid overheating of the system, a safety circuit has been built in. Therefore, your system may switch to Standby mode automatically under extreme conditions. If this happens, let the system cool down before reusing it.

## Step 2: Connecting speakers and subwoofer

Connect the speaker wires to the SPEAKERS (FRONT) terminals, right speaker to "R" and left speaker to "L", coloured (marked) wire to "+" and black (unmarked) wire to "-". Fully insert the stripped portion of the speaker wire into the terminal as shown.

- Connect the Surround Speakers and Center Speaker system using the supplied speaker cable to the speaker jacks on the SUBWOOFER by matching the colours of the jacks and speaker plugs.
- Connect the subwoofer using the supplied speaker cable to the DIN OUT jack on the DVD Mini Hi-Fi System.
- Connect the AC MAINS .

speakers	Θ	$\oplus$
Front Left(L)	Black	White
Front Rignt(R)	Black	Red
Center	Black	Green
Surround(Rear) Left(L)	Black	Blue
Surround(Rear) Right(R)	Black	Grey

Notes:

- For optimal sound performance, use the supplied speakers.

 Do not connect more than one speaker to any one pair of +/- speaker terminals.

 Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

## Step 3: Connecting TV set

#### **IMPORTANT!**

- You only need to make one video connection from the following options, according to the capabilities of your TV system.
- S-Video or Component Video connection provides higher picture quality. These options must be available on your TV set.

- Connect the system directly to the TV set.

#### Using Video In jack (CVBS)

 Use the composite video cable (yellow) to connect the system's VIDEO jack to the video input jack (or labeled as A/V In,Video In, Composite or Baseband) on the TV set.

#### Using LINE OUT jack (L/R)

 To listen this system channels through TV, use the audio cables (white/red) to connect LINE OUT (L/R) jacks to the corresponding AUDIO IN jacks on the TV set.

#### Using component Video In jack (Pr PbY)

- Use the component video cables (red/blue/ green) to connect the system's Pr PbY jacks to the corresponding Component video input jacks (or labeled as Pr, Pb,Y or YUV) on the TV set.
- To listen this system channels through TV , use the audio cables (white/red) to connect LINE OUT (L/R) jacks to the corresponding AUDIO IN jacks on the TV set.

## Connections

## Using S-Video In jack

- Use the S-Video cable (not supplied) to connect the system's S-VIDEO jack to the S-Video input jack (or labeled as Y/C or S-VHS) on the TV set.
- To listen this system channels through TV, use the audio cables (white/red) to connect LINE OUT (L/R) jacks to the corresponding AUDIO IN jacks on the TV set.

#### Using an accessory RF modulator

- Use the composite cable (yellow) to connect the system's VIDEO jack to the video input jack on the RF modulator.
- Use the RF coaxial cable (not supplied) to connect the RF modulator to your TV's RF jack.

#### **IMPORTANT!**

- If your TV set only has a single Antenna In jack (or labeled as 75 ohm or RF In), you will need a RF modulator in order to view the DVD playback via TV. See your electronics retailer or contact Philips for details on RF modulator availability and operations.

## Step 4: Connecting FM/MW antennas

- Connect the supplied MW loop antenna to the MW jack. Place the MW loop antenna on a shelf or attach it to a stand or wall.
- Connect the supplied FM antenna to the FM jack. Extend the FM antenna and fix its end to the wall.

For better FM stereo reception, connect an outdoor FM antenna to the FM ANTENNA terminal.

Notes:

- Adjust the position of the antennas for optimal reception.

 Position the antennas as far as possible from your TV set, VCR or other radiation sources to prevent unwanted interference.

# Step 5: Connecting the power cord

After everything is connected properly, plug in the AC power cord to the power outlet.

Never make or change any connection with the power switched on.

#### On the DVD Mini Hi-Fi System

"RUTD INSTALL-PRESS PLRY" may appear on the display panel. Press ►II on the front panel to search and store all available radio stations or press ■ to exit.

If your system is equipped with a Voltage Selector, set the VOLTAGE SELECTOR to the local power line voltage.

# Step 6: Connecting a VCR or cable/satellite box

#### Viewing and listening to playback

Connect the VCR or Cable/Satellite Box to the TV system as shown.

Connect the system's AUX IN jacks to the AUDIO OUT jacks on the VCR or Cable/ Satellite box.

Before starting operation, press  $\mbox{AUX}$  on the remote control to select "AUX" in order to activate the input source.

#### Using the VCR for recording DVDs

Some DVDs are copy-protected. You cannot record or dub protected discs using a VCR.

- Connect the system's VIDEO jack to the VIDEO IN jack on the VCR.
- Connect the system's LINE OUT (R/L) jacks to the AUDIO IN jacks on the VCR. This will allow you to make analog stereo (two channel, right and left) recording.

#### To view DVD playback while recording

You must connect the system to your TV system using the S-VIDEO (as shown above) or the Component (Pr Pb Y) video connection.

## Step 7: Connecting digital audio equipment

#### Recording(digital)

Connect the system's DIGITAL OUT jack to the DIGITAL IN jack on a digital recording device (DTS-Digital Theater System compatible, with a Dolby Digital decoder, for example).

Before operation, set the DIGITAL OUTPUT according to the audio connection.

## **Basic Function**

# Basic function

Before you operate the system, complete the preparation procedures.

#### Switching the system on

- Press STANDBY ON () or SOURCE.
   The system will switch to the last selected source.
- Press DISC,TUNER,TAPE or AUX on the remote control.
   The system will switch to the selected source.

#### Switching the system to Standby mode

- Press STANDBY ON <sup>(1)</sup> in the active mode.
   The backlight of display is dim in standby.
- The volume level, interactive sound setting, last selected mode, source and tuner presets will be retained in the player's memory.

#### Power-saving automatic standby

 As a power-saving feature, the system will automatically switch to standby mode if you do not press any buttons within 30 minutes after a disc or tape has stopped playing.

#### **Demonstration mode**

The system has a demonstration mode that shows various features offered by the system.

#### Activating demonstration

- In Standby, press and hold STOP to activate demo mode.
  - → "IEMO ON" is displayed.
  - → Demonstration will begin.

#### **Deactivating demonstration**

- Press and hold STOP on the system ,or press DISC key, or press STANDBY ON key, until "IEMO OFF" is displayed.
  - → The system will switch to DISC mode.

#### Note:

 Even if you remove the AC power cord and reconnect it to the wall socket, the demonstration will remain off until you activate it again.

#### Plug and Play (for tuner installation)

Plug and play allows you to store all available radio stations automatically.

#### If plug and play has not been installed

When you turn on the system, "AUTD INSTALL- PRESS PLAY" will be displayed.

- → **PROG** will start to flash.
- The system will search all radio stations on the FM band, and then the MW band.
   All available radio stations with strong signal strength will be stored automatically.
   The system will stop searching when all available radio stations are stored or when the memory for 40 preset radio stations is full.
   The first preset radio station will play when Plug and Play is completed.

#### Reinstalling plug and play

- In Standby or demonstration mode, press and hold ►II on the system until "AUTD INSTALL -PRESS PLAY" is displayed.
- Press >II again to start installation.
   All previously stored radio stations will be replaced.

#### To exit without storing the plug and play

Press ■ on the system.

#### Notes:

 When the power is turned on, the disc tray may open and close to initialise the system.

 If Plug and Play installation is not completed, it will be reinitiated the next time you power on the system.

 If auto-install is not preset, the system will store the radio station automatically.

# **Disc Operations**

#### **IMPORTANT!**

- This system is designed for regular discs. Therefore, do not use any accessories such as disc stabiliser rings or disc treatment sheets, etc., as offered on the market, because they may jam the disc mechanism.

- Do not move the system during playback. Doing so may damage the system.

- Do not push on the disc tray or put any object other than disc on the disc tray. Doing so may cause the system to malfunction.

- DVD discs and players are designed with regional restrictions. Before playing a disc, make sure the disc matches the regional code of your player.

- According to the format requirement of DVD or VCD, some operations may be different or restricted.

## **Playing discs**

- Press STANDBY ON <sup>(1)</sup> to switch on the system, and then press DISC to select disc mode.
- Power on the TV system and set to the correct Video In channel.

→ You should see the blue Philips DVD background screen on the TV set.

Press OPEN/CLOSE to open the disc tray and load a disc respectively.

→ Make sure the disc label is facing up. For double-sided discs, load the side you want to play facing down.

④ Press OPEN•CLOSE to close the disc tray.
→ "JISE LORDING" will be displayed.

- I Press ►II to start playback.

#### For MP3

Load an MP3 disc in the disc tray.

## Glossary

**Analog:** Sound that has not been turned into numbers. Analog sound varies, while digital sound has specific numerical values. These jacks send audio through two channels, the left and right.

**Aspect ratio:** The ratio of vertical and horizontal sizes of a displayed image. The horizontal vs. vertical ratio of conventional TVs. is 4:3, and that of wide-screens is 16:9.

**AUDIO OUT Jacks:** Jacks on the back of the DVD System that send audio to another system (TV set, Stereo, etc.).

**Bit Rate:** The amount of data used to hold a given length of music; measured in kilobits per second, or kbps. Or, the speed at which you record. Generally, the higher the bit rate better the sound quality. However, higher bit rates use more space on a Disc.

**Chapter:** Sections of a picture or a music piece on a DVD that are smaller than titles. A title is composed of several chapters. Each chapter is assigned a chapter number enabling you to locate the chapter you want.

**Component Video Out Jacks:** Jacks on the back of the DVD System that sends high-quality video to a TV set that has Component Video In jacks (R/G/B, Y/Pb/Pr, etc.).

**Disc menu:** A screen display prepared for the selection of images, sound, subtitles, multi-angles, etc recorded on a DVD.

**Digital:** Sound that has been converted into numerical values. Digital sound is available when you use the DIGITAL AUDIO OUT COAXIAL or OPTICAL jacks. These jacks send audio through multiple channels, instead of just two channels as analog does.

**Dolby Digital:** A surround sound system developed by Dolby Laboratories containing up to six channels of digital audio (front left and right, surround left and right and center).

**JPEG:** A still-picture data compression system proposed by the Joint Photographic Expert Group, which features small decrease in image quality in spite of its high compression ratio.

**MP3:** A file format with a sound data compression system, "MPE" is the abbreviation of Motion Picture Experts Group 1 (or MPEG-1) Audio Layer 3. Through the MP3 format, one CD-R or CD-RW can contain about 10 times as much data volume as a regular CD can.

Multichannel: DVD is specified to have all sound tracks constitute one sound field. Multichannel refers to a structure of sound tracks having three or more channels.

**Parental control:** A function of the DVD to limit playback of the disc by the age of the users according to the limitation level in each country. The limitation varies from disc to disc; when it is activated, playback will be prohibited if the software's level is higher than the user-set level. **Playback control (PBC):** Refers to the signal recorded on video CDs or SVCDs for reproduction control. By using screen menus recorded on a Video CD or SVCD that supports PBC, you can enjoy interactive-type software as well as software having a search function.

**Progressive Scan:** It displays all the horizontal lines of a picture at one time, as a signal frame. This system can convert interlaced video from DVD into progressive format for connection to a progressive display. It dramatically increases the vertical resolution. A progressive scan TV set is needed to receive progressive scan output from the player.

**Region code:** A system allowing discs to be played only in preset regions. This unit will only play discs that have compatible region codes. You can find the region code of your unit from the product label. Some discs are compatible with more than one region (or ALL regions).

**S-Video:** Produces a clear picture by sending separate signals for luminance and the color. You can use S-Video only if yourTV set has S-Video In jack.

**Sampling Frequency:** Frequency of data sampling when analog data is converted to digital data. Sampling frequency numerically represents how many times the original analog signal is sampled per second.

**Title:** The longest section of a picture or music feature on DVD, music, etc., in video software, or the entire album in audio software. Each title is assigned a title number enabling you to locate the title you want.

**VIDEO OUT jack:** Jack on the back of the DVD System that sends video to TV.
