PHILIPS

Highlights

360Sound

Vastly different from a conventional 5.1 home theater, 360Sound is uniquely designed with three drivers in each satellite speaker – a front one, and two side firing ones which are angled to project immersive sound around you. In addition to the principle of dipoles, Philips uses a proprietary algorithm to further enhance the embracing sound effect. Built with premium acoustic components like soft dome tweeters, Neodymium magnets and Class D digital amplifiers, 360Sound delivers exceptional sound from all angles – giving you a true cinema experience in your own home.

Full HD 3D Blu-ray

Be enthralled by 3D movies in your own living room on a Full HD 3D TV. Active 3D uses the latest generation of fast switching displays for real life depth and realism in full 1080x1920 HD resolution. By watching these images through special glasses with right and left lenses that are timed to open and close in synchrony with alternating images, the full HD 3D viewing experience is created in your home cinema. Premium 3D movie releases on Blu-ray offer a wide, high quality selection of content. Blu-ray also delivers uncompressed

surround sound for an unbelievably real audio experience.

Philips Net TV with Wi-Fi

Experience a rich selection of online services with Net TV. Enjoy movies, pictures, infotainment and other online content directly on your TV whenever you like. Simply connect your home theater directly to your home network through the ethernet connection, and navigate and select what you want to watch with the remote control. The Philips menu gives you access to popular Net TV services fitted for your TV screen. Additionally, with the DLNA certified PC network you can watch videos or access pictures stored on your computer using your remote control.

Dolby TrueHD and DTS-HD

Dolby TrueHD and DTS-HD Master Audio Essential deliver the finest sound from your Blu-ray Discs. Audio reproduced is virtually indistinguishable from the studio master, so you hear what the creators intended for you to hear. Dolby TrueHD and DTS-HD Master Audio Essential complete your high definition entertainment experience.

EISA award

EISA recognizes the features to be appreciated by people seeking high quality & creative facilities.

Philips HTS 9520's novel satellite speakers, each comprising multiple drivers are the key. The lower cabinet features two side-firing units which act as dipoles while the top cabinet utilizes a conventional bass/treble arrangement. These are driven from Class D amplifiers in the HTS9520's main DVD/BD player, which also includes custom DSP to further enhance the system's surround sound. With a subwoofer providing a solid foundation for the midrange and treble, the result is a sound that surrounds you in new and exciting ways! This product is ready for both 3D TV and wireless access to your PC.
