- Caller ID on call waiting
- Operators services phonebook

Memory Capacity

- Name & number shared phonebook: 65
- Melody download capacity: -
- SMS storage capacity: 25
- Call log entries: 40

Highlights

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Backlight on screen

Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green color, while EL panels are smooth with blue, white or green shades.

Clock alarm timer

Clock alarm timer

Keypad lock

How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidentally pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Pilot key & carousel menu

The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Baby-sit function

Worried about your baby not sleeping? No need to constantly go and check in his bedroom. The baby-sit mode allows you to keep an ear on him wherever you are in the house.

Do-not-disturb function

Tired of your children's friends calling just when you're about to serve dinner? The "Do-not-Disturb" function lets you screen unwanted calls and mute the ringer when you do not wish to be disturbed, but keeps the line open to the family.
