Elegant and compact

- Compact design for any space, any lifestyle

PHILIPS
sense and simplicity

Docking speaker
for iPod/iPhone Clock display

Highlights

Compact design

Compact design for any space, any lifestyle

Auto clock synchronisation

When connected and docked, this docking system will automatically synchronise the clock with your iPod/iPhone within a few seconds. With this convenient feature, you do not need to set the time manually.

Aux-in connection

Aux-in connection for your portable MP3 music player

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Play and charge your iPod/iPhone

Enjoy your favourite MP3 music while charging your iPod/iPhone! The dock lets you connect your portable device directly to the Docking entertainment system so you can listen to your favourite music in superb sound. It also charges your iPod/iPhone while it plays so you can enjoy your music and not have to worry about your portable player battery running out. The Docking entertainment system automatically charges your portable device while it is docked.

AD300/12
