- Learning IR codes
- Learning frequency range: 30–60 kHz

Accessories

- Battery: Yes, CR2032 Coin cell Battery 3V Lithium

Outer Box

- Length: 306 mm
- Width: 70 mm
- Height: 160 mm
- EAN/UPC/GTIN: 87 12581 31448 4
- Quantity: 3

Packaging Data

- 12NC: 867000026263
- EAN/UPC/GTIN: 87 12581 30765 3
- Height: 26 mm
- Length: 302 mm
- Width: 155 mm

Highlights

Learning functionality

Learning functionality refers to the process through which a remote control captures and stores infrared signals from other remotes for later use. When device codes are not included in the on-board database, they can always be learned from the original remote, simply by pointing to it.

4-in-1 home entertainment remote

Replace a table full of remote controls with one unit that'll operate your TV, satellite receiver (or cable set-top box [STB]) DVD player/recorder and receiver (AMP), regardless of the brand or model.

Slider mechanism

A slider remote is an elegant, fun and convenient way of controlling your home entertainment equipment.

Slider functionality

A slider remote provides functionality on the outside of the remote as well as on the inside by sliding it open. The top of the slider remote contains the most commonly used functions. Additional functionality becomes available when the remote is opened.
